Thread: [Genius! This Site Lets You Clone and Change Any Website!](#)

Ford Raptor - September 15, 2015, 1:59 pm

This site is brilliant. It lets you take any website and very easily clone/change it to create your own very real looking hoax/spoof stories.

Here's an example I just created to test it out:

Hack Forums and Google are fighting for the 2nd most valuable company spot:

I wasn't being overly creative, I just wanted to see how easy it was to use. And it took less than 2 minutes. The result is a perfect replica of the original news story and looks totally original (apart from the URL of course).

I can see people having a lot of fun with this. Sending hoax links to friends, creating amusing hoaxes for your own sites, getting some viral activity on social networks, starting parody news sites - the possibilities are endless!

Here's the site:

<http://clonezone.link/>

Post your edit.

Enjoy playing around with it guys!

imagine what you can do with this to bypass honey pot servers by making the honey pot server think your the main website so it let's an attacker through sorta like cgi proxies and bypassing firewalls with cgi proxies and so on..
