Thread: [Some guy giving out free RDP's with suspicious files on it.](#)

Sup guys,

So i came across a thread here on HF where this guy is giving out free RDP's to everyone. I just asked for one to check it out.

Well, once i logged into it, i found all kind of suspicious files which are related to carding. PDF files with personal information etc.

So I've got a feeling this guy is trying to erase his footsteps after he's done the big job by carding. He has a good reputation on Hackforums though...

What do you think?

I'm not accusing or judging anyone though.

They are obviously cracked and I doubt he checks them.

Did you at least find this carding stuff on more then one? anyone else seen this?

do a little more research before you make a thread like this.

Like Cole said, do some further research to find out if there's a pattern or if it's just coincidence. As far as that specific RDP goes though, back the fuck away real quick like.. just to be safe.

Yep, might be just a coincidence.

Anyways, I'm just gonna dump this RDP somewhere public to get rid of my footsteps.

Smart move. PM other people who posted on the thread and ask if they have any similar files on it.

Ah this utente rdp. Just leave it alone, it's nothing special and nothing has been done there.

No need to be suspicious or afraid.
