Thread: [How to copy iphone files from one iphone to another iphone](#)

unopie - September 16, 2015, 2:51 pm

Assume I have a ssh client open, and it connected to a different iphone. Also assume I know the file path that I want to copy over.

How would I do this? (I have already googled. I need technical knowledge.)

unopie - September 20, 2015, 9:43 am

Anyone know anything about this?

laferda - September 29, 2015, 4:35 pm

just use itools 3 eng version :)

?Sh?wn - September 29, 2015, 4:36 pm

I have no clue what you mean by this because I don't really involve myself in Jailbreaking shit.

But you can move regular stuff using iCloud.

?lex - September 30, 2015, 4:49 am

Simple answer. Use iCloud.

No say I am at a store, I notice that other iphones have the openssh service running, I am now running their terminal, how can I copy files from their.

unopie - October 3, 2015, 11:57 am

Somebody has to have knowledge of the iphones ssh terminal?
