Thread: [The difference between boosting with hacks and without hacks?](#)

i a m g o n e - September 16, 2015, 4:02 pm

The title im confused

Like i want to start boosting but i would use UNDETECTED hacks

Like whats the difference/bad thing???

Legit Hacking is obviously bannable and if you get banned the person that bought boost from you will obviously get reset to their original rank for playing with a hacker a.k.a you.

now if you were to play legit. there is nothing to worry about.

in my opinion.

Not sure if this "exploit" still works, but might be worth a try:

Ragehacking is a lot faster for boosting

holych eater - September 16, 2015, 4:37 pm

"Most" people how claim legit boost are "legit/low settings" hacking.

Just claim legit and use private hack. DONT WALL/esp. I found the most common rank being boosted is dmg/le so if you are SMFC or GE you probs dont even need cheats.

I also suggest having a few accounts at different ranks so you don't have to 5man. Also learn the tricks to boosting. Leaving and mvps etc.

Make a nice thread with undercut prices to gain some rep and vouch. i suggest making a thread design in photoshop or paying some kid 4\$

GLWS op :)

Thanks lol

Also my account cant even play comp yet lmao but could i still boost in like casual?

holychheater - September 16, 2015, 4:53 pm

you talking about rank 3 boost ? eh i just play casual for a little bit on a Tuesday then again on Wednesday (bonus xp reset) quick and easy. make sure u top frag.

Wow that's actually pretty interesting. Seems like it would work.

Might be patched though, idk.
