Thread: [E-Whoring - Amazon Dipping Methods](#)

McFunny - September 17, 2015, 9:29 am

Hello!

I am not sure how many people know this methods and if all of them were posted on Hack Forums already, but I think it might help some people to earn more with e-whoring.

With this method, you can get multiple payments for same pictures, but it depends on your social engineering skills, if your victim will believe you or not.

If you are sure that your victim will believe you and continue to send you more and more Amazon gift cards, then you can try all following methods on him.

This thread also includes success rates. I am using this methods for a long time, so about month ago I wanted to calculate success rate and see what is the best way to do it.

All success rates are calculated from 20 victims that paid and used same method for all of them. Success rate also depends on your social engineering skills.

1. Method – Wrong code

Success rate ~ 80%

This method is quite simple. You have to go to Amazon website and to redeem gift card code. You have to enter wrong code and after that, replace it with real one and tell your victim that the code is not working and if he can send it one more time. I have to say that this method works for me on more than 80% of victims so yeah, takes almost no time and gets you double money.

2. Method – Similar email address

Success rate ~ 75%

This method is the most common one and most people do it. You need to have two different, but similar email addresses (etc. laura11@gmail.com and laura111@gmail.com). After your victim sends you Amazon gift card say that you didn't give him the right email address and send it to other one, but do not redeem the one from your first email because your victim can see if it's redeemed or not! After you receive second one and send pics/vids to your victim, you can redeem cards.

This method can work more than two times, but usually not all victims will want to pay more than twice.

3. Method – Email spoofer

Success rate ~ 80%

There are many websites on internet that allows you to send someone email from any email address you want. For this method, you will need to get your victims email. You can send him one picture or something to get it, I am sure they will give you their email address. When you get it, go to email spoofer, use your imagination and write them an email that gift card purchase was denied and they will get refund in the next 24-48 hours. Some of email spoofers gets their emails in spam folder so make sure to remind your victim to check if they got any email in spam as well.

I also tried to use more methods at the same time to see what is the best way to do it and I got the following results.

Method 1 and Method 2 ~ 60%

Method 1 and Method 3 ~ 55%

Method 2 and Method 3 ~ 40%

Method 1, Method 2 and Method 3 ~ 25%

At the end you can see that dipping is not really that hard, but it can get you more money. Hope this helped you a little guys, good luck e-whoring.

Fast Drips - September 17, 2015, 10:28 am

I will try this out and tell you guys if it works.

Spyro657 - September 17, 2015, 10:40 am

Wow, and you just joined HF? This is a great first post! Welcome to HF OP ?

Also thanks for this, i might try this

Ronaldo. - September 17, 2015, 10:55 am

I have tried method 1 and 2 but method 3 works always like a charm.

EternalSlayer - September 17, 2015, 11:57 am

You need a fud spoofer or it marks it as fake

(Sep 17, 2015 11:57 AM)EternalSlayer Wrote: [\[CITE\]](#) You need a fud spoofer or it marks it as fake! don't get you.What are you talking about ?

McFunny - September 17, 2015, 12:10 pm

(Sep 17, 2015 12:01 PM)Ronaldo. Wrote: [\[CITE\]](#) I don't get you.What are you talking about ?He wanted to say that if you are sending emails from random email spoofers that you find on Google, your victim will get those email in spam folder.

You can do two things here. First one is to find FUD email spoofer or you can talk to your victim and ask them if they got any email from Amazon and to check spam folder.

You can do two things here. First one is to find FUD email spoofer or you can talk to your victim and say him if they got any email from Amazon and to check spam folder.Thanks for explaining it I always say to my victim "Please also check your spam folder" and it works always.

But I also wanted to know about FUD email spoofer.Can someone explain about FUD email spoofer also ?

Snapbytes - September 17, 2015, 12:17 pm

Some instructions are unclear. Ive done 1 and 2 but not the 3 because of too much work to do. In the first method, you have to put the wrong code and redeem it, it will show you an error. Then put the right code and make a screenshot of it, send it to your client and tell them that the code isn't working, make sure that when double dipping, dont redeem the code right away or it will notify or they will see that the gc is already redeemed.

oh well, im drunk so fuck it. happy fucking ewhoring.

But I also wanted to know about FUD email spoofer.Can someone explain about FUD email spoofer also ?That means that if you send spoofed email to your victim, they will get it in normal inbox and not in the spam folder.

I don't really know if it's hard to find them, beacuse I just say my victim to check spam folder. Easier than finding FUD email spoofer probably.

oh well, im drunk so fuck it. happy fucking ewhoring.I didn't really go step by step I agree, but I hope people understand what to do.

About third method. I think you should try it, because you have to make sample email only once and then copy paste for next victims.

daily smoker - November 6, 2015, 11:37 am

thank you, cool tricks gonna try them.

BoxLogoSupreme - November 6, 2015, 11:58 am

My method was since I live in Canada people always send me .com code instead of .ca so i tell them to re send to the right one.

Lil Herbo - November 6, 2015, 3:03 pm

I have a method I use currently. I'll probably release when I quit. It has never failed for me expect triple/quad or higher.

Hurt Locker - November 6, 2015, 3:39 pm

never had success with one of these methods maybe I'm doing something wrong..

ANTHONY - November 6, 2015, 4:27 pm

I advice people to not use the similar email one): I tried 5/6 times and every time I go to redeem the code after they send it to the main email and the code doesn't work..

Canefan - November 6, 2015, 4:49 pm

dude these methods never work for me LOL. they have to be dumb enough to buy another... with me they just resend the same one.
