This is the Name and Shame policy in action.

Quote:Name and Shame Policy

Anyone reversing payments to HF are subject to a closed account and their payment details and account information placed directly into their signature for public viewing. If you want to reverse a payment to HF then go for it but we will make sure you are named and shamed and the data will not be removed. Your payment and account details will be made public and searchable at Google. You are warned.

Its a policy that's been in place for several months now. If you charge back on anything you will have your account closed and your information released to the public.
