I reviewed this e-Book and I can definitely say it's great. Probably one of the most useful ebooks. I definitely recommend buying this if you are dealing with a lot of customers like me, as its just a matter of time as when you will get hit with a charge-back.

I just found the wording strange as one does not (usually) have to pay for a refund.

I wouldn't recommend spending your hard earned money on this garbage. Had the chance to review it and all the information is public. If you are dealing with a dispute PM me and I will help you. This is pointless, worthless, and a filth in the marketplace.

Note look at his TOS "If you do not win a dispute in 30 days" so hes basically saying that you can lose disputes so lets say if you lose around 5 disputes and win 1 you cant get a refund because you won one this is some high quality bullshit

Even though the methods in this book will work 99 percent of the time, some people might not use them correctly. Giving a refund for everything is actually unreasonable, and if you were in this situation you would not fulfill something like this either.

Yes, works for all items, all situations. The ebook has 4 different methods for every situation you might encounter, including intangible goods.
