Thread: [quick test slaves pls](#)

k?'rlzm? - September 19, 2015, 12:43 pm

can someone quickly test new RAT for me?

thanks in-advanced.

Dont have VM and sandboxie not working atm.

xRaiders - September 19, 2015, 1:06 pm

skype pinkrusher add me i will test it now

IHasBrains - September 19, 2015, 3:22 pm

Can't you use your "great" spreading method to get some clients to test your new rat? Just curious.

Well if you think logically how will I know it's working?

No point putting it on my autopilot method and it might not be even working.

IHasBrains - September 19, 2015, 3:44 pm

I assumed, you have a few clients already.

Incendiary. - September 19, 2015, 9:45 pm

If you still need this hmu with a direct download link in a PM and i can provide one.

FastCrypt - September 19, 2015, 11:14 pm

Yeah I can run it on a few vm's I have running

#Skyline - September 19, 2015, 11:18 pm

Dude I don't get why you're selling a spreading guide ?

kneegurs - September 19, 2015, 11:21 pm

anyone that has to ask for slaves while selling a guide on spreading gtfo.

? I just noticed. OP, Surely you have slaves on a different RAT? Just download/execute them on there.

IF you cant for whatever reason i can install your stub on one.

I stopped ratting. I got rid of all my slaves, but I started again. New RAT and crypter. But I can still sell the method I used...so all I asked for a test to make sure it was fully working before I use the autopilot because I wouldn't haven't a clue if it was working or not.

why do you care? Use your brain.

Calm down, ?
