Thread: [Read StdOut/Command Line from External Process?](#)

Cesar Morales - September 19, 2015, 7:06 pm

Basically I need to read the command line/stdout of a process that wasn't created by my application. My process is .NET and the one I am trying to read is native.

Does anyone know how to do this?

BahNahNah - September 19, 2015, 7:14 pm

I dont think you can do it if you didnt start the process.

Not even being able to hook it and intercept the stdout?

Also I am using a RunPE to create the process. Does that make it possible to read?

Mr. Dr. Prof. Patrick - September 19, 2015, 7:40 pm

AttachConsole allows you to connect to another process window, get the input handle and read from it, or if you gonna hook, you will need to hook ReadConsole/ReadConsoleInput

Any places you'd recommend I start for going about attaching to the console?
