Thread: [DO NOT USE FreeDNS.Afraid.org!!!](#)

Tennessee - September 20, 2015, 12:45 pm

So, on 9/15/15 my FreeDNS.Afraid account got limited and I can now no longer use my account. Out of no where this happened, I wasn't doing anything out of my normal routine of ratting or anything.

Here is the picture of my IP black listed and all the information that freedns.afraid has gathered about me...

I do not think it is safe for anyone to use FreeDNS.Afraid do to the amount of information they gather.

[img]http://s12.postimg.org/moc303vu5/my_ip_black_listed.png[/img]

FML.. Just Fucking great.. Thats all I need is some pig at my door step.
Read this.. FreeDNS uses this company for blacklisting and for investigations..

DNS Host To Use (SAFE):

Respond to

thread and I will add to post.

DNS Host Not To Use (NOT SAFE):

Freenom

(Sep 20, 2015 01:54 PM)sudoaptgetusr Wrote: [\[CITE\]](#) My Freenom domain was deactivated within a week after using it some time ago. Don't use it.DuckDNS

FreeDNS.Afraid

no-ip

xxleonderpxx - September 20, 2015, 12:59 pm

Thanks for the heads-up dude, this sucks ;/

FSBN - September 20, 2015, 1:07 pm

nawwww that sucks tho... I hope this is a troll

SIM-2502833 - September 20, 2015, 1:09 pm

Woah, duckdns, now freedns, what now?

Anyone have an alternative? I need to restart everything now :/

Krew - September 20, 2015, 1:11 pm

Would running a DNS server be safe?

I have quite a few 10Gbit servers laying around...

SIM-2502833 - September 20, 2015, 1:12 pm

^I highly doubt you would get in trouble, if you start one up, be sure to let me know :P

Tostig - September 20, 2015, 1:13 pm

Use a VPN while doing this. Even then, it's unfortunate, since the server of the VPN you're using might get investigated.

Fudster - September 20, 2015, 1:14 pm

Buy your own VPS. install CPanel DNS only on it? :P

<https://documentation.cpanel.net/display/ALD/Installation+Guide+-+Install+cPanel+DNSONLY>

y B Z - September 20, 2015, 1:18 pm

lol 9/55 detectin rate prayers

IHasBrains - September 20, 2015, 1:29 pm

Thank you for posting this! Ill consider switching to an other dns, which is not overused.

Vault-tec headquarters - September 20, 2015, 1:29 pm

I saw a post a few weeks ago about a .tk dynamic dns site.. anyone catch what it was?

IHasBrains - September 20, 2015, 1:31 pm

(Sep 20, 2015 01:29 PM)Vault-tec headquarters Wrote: [\[CITE\]](#) I saw a post a few weeks ago about a .tk dynamic dns site.. anyone catch what it was?

You can use a *.tk domain (or any other from freenom.com) instead of a dns server.

'Cynical - September 20, 2015, 1:32 pm

Can someone explain to me why you don't just buy a domain from namecheap or something? Namecheap even accepts BTC.

J?son - September 20, 2015, 1:34 pm

(Sep 20, 2015 01:29 PM)Vault-tec headquarters Wrote: [\[CITE\]](#) I saw a post a few weeks ago about a .tk dynamic dns site.. anyone catch what it was?

I believe you are talking about <http://www.freenom.com>

Tennessee - September 20, 2015, 1:39 pm

Sorry about the bad news.. I just don't want anyone that is using their home connection to RAT to get in trouble. I will try to find another DNS place and let you guys know what I find.

Whats the deal with DuckDNS? Are they cracking down as well?

xxleonderpxx - September 20, 2015, 1:41 pm

(Sep 20, 2015 01:39 PM)Tennessee Wrote: [\[CITE\]](#) Sorry about the bad news.. I just don't want anyone that is using their home connection to RAT to get in trouble. I will try to find another DNS place and let you guys know what I find.

Whats the deal with DuckDNS? Are they cracking down as well?

Yeah duckdns is part of a honeypot network now.

ze-slade - September 20, 2015, 1:42 pm

Well, seems like all dns providers are cracking down.

Armada - September 20, 2015, 1:50 pm

Man, I knew it would not be long.

They saw the influx of malware use and did what every other free provider is going to do. - Crack down.

I find it again important to note the following thread:

<https://hackforums.net/showthread.php?tid=4921786>

For RA4WVPN users, I have premade DNS already, see [THIS SPREAD SHEET](#)

Tennessee - September 20, 2015, 1:51 pm

Where has the privacy of the web gone! I remember 3-5 years ago when ratting was never an issue. We all used no-ip without any issues, until they were bought out.

sudoaptgetusr - September 20, 2015, 1:54 pm

(Sep 20, 2015 01:34 PM)ROOT Wrote: [\[CITE\]](#) I believe you are talking about <http://www.freenom.com> My Freenom domain was deactivated within a week after using it some time ago. Don't use it.

Vault-tec headquarters - September 20, 2015, 2:07 pm

ya know out of all the things i've seen on here i'm suprised i havn't seen someone come forward and come out with a dns for people to use without fear of it being like noip or duckdns. If i own my own domain through godaddy how would i use it as a dynamic dns like freedns?

SIM-2502833 - September 20, 2015, 2:15 pm

(Sep 20, 2015 02:07 PM)Vault-tec headquarters Wrote: [\[CITE\]](#) ya know out of all the things i've seen on here i'm suprised i havn't seen someone come forward and come out with a dns for people to use without fear of it being like noip or duckdns. Better to use off shore ones

Armada - September 20, 2015, 3:23 pm

(Sep 20, 2015 02:30 PM)MrMcShroom Wrote: [\[CITE\]](#) Do you have a list for 143VPN servers? I can make one for you if you'd like, if not, I will jsut give you one server I normally use later in PM ?
I will gladly generate a list if one is provided to me ?

QU?CKSILVER - September 20, 2015, 3:46 pm

As someone mentioned several days ago, try to locate DNS providers that are not popular or common before even thinking about getting a domain name. This reduces the risk of getting your shit seized A LOT for these kind of purposes...

After most of these public DNS services went bitchy, I just stopped relying on any public DNS service providers at the moment... I'm taking advantage of a free domain name that is in-built an IP Camera that I own. The surveillance company that sells it (not gonna mention the name) hosts their own DDNS service for their customers to use and it's freaking amazing. I just need to keep the camera connected to my home Internet connection, it scans for IP changes every 1 minute or less and updates everything really fast. It's been more than a year and nothing has happened.

Armada - September 20, 2015, 3:49 pm

BUY A DOMAIN

Problem solved...

QU?CKSILVER - September 20, 2015, 3:51 pm

(Sep 20, 2015 03:49 PM)A?mªDa Wrote: [\[CITE\]](#) BUY A DOMAIN

Cyb3rW0lf - September 20, 2015, 7:15 pm

Not sure about this dns, because I just started to use it but changeip might work. I want some verification tho.

Tennessee - September 20, 2015, 7:42 pm

(Sep 20, 2015 07:15 PM)Cyb3rW0lf Wrote: [\[CITE\]](#) Not sure about this dns, because I just started to use it but changeip might work. I want some verification tho.Cyb3rW0lf, I am using Changelp right now as well. I'm not sure if they are going to let me rat or not... we will see.

Pharmacist - September 20, 2015, 7:47 pm

This is what happens when you don't know what to look for.

OP, use a German/Russian VPN and google search "Dynamic DNS server inurl:".de" or ".ru" "

This will only bring up results from Russia/Germany, and they are much safer.

Cyb3rW0lf - September 20, 2015, 8:10 pm

(Sep 20, 2015 07:15 PM)Cyb3rW0lf Wrote: [\[CITE\]](#) Not sure about this dns, because I just started to use it but changeip might work. I want some verification tho.

It'll only be a matter of time before they start cracking down like the rest of the free DNS providers.

f1sh - September 20, 2015, 8:19 pm

Looks like someone reversed your executable and reported your DNS, whether or not you want to keep using them is up to you...nevertheless trusting an outside source like this is just a bad idea in the long run.

#Skyline - September 20, 2015, 9:12 pm

Nothing comes good out of public DNS providers, I guess noobs will be noobs.

I'd recommend creating your own DNS.

They wouldn't of taken action unless your DNS was reported to your provider for malicious activity.

Your spreading methods fucked you up here, someone traced your malware and did alittle bit of analyzing to your malware, the user who analyzed your malware would of reported you to your DNS provider because of this.

Doesnt mean the DNS provider wont ban you

topkekm80s - September 20, 2015, 11:25 pm

Why do people not know about and use this feature in LL!?!? It's a really REALLY important one!

In short, make a pastebin account or a website and set the bots to look at the site on boot. (It's done automatically when you set the target site). USE THIS!
If your DNS gets shut down, make a cmd and post it there on the target site you set.
More here: <https://hackforums.net/showthread.php?tid=4826868>
