Hi, i just wanted to let you guys know that all these sports gambling sites offer amazing promotions e.g <http://sports.coral.co.uk/> offers £20 in free bets if you deposit and place a bet of £5. Which is amazing because there are a lot of these websites that offer these sort of deals. You can, with a bit of luck, get around £30 per website.

Im not saying that you will make that but its highly unlikely that you will lose any money. I'll be starting this from tomorrow (22/09/2015) so follow me on twitter if you want to see what im going to be betting on with my free bets if you have 0 clue on what to bet on.

The first website that I will be using is <http://sports.coral.co.uk/>, all you need is £5.
Its like "matched betting" but we will take a little risk :P
I will be betting on football only(soccer).

This is not a long term thing. We are just going to take advantage of the "sign up" promotions that nearly every website has.

Im 90% sure that i will not lose money ;P My predictions should be good enough. Coral gives you 4 x £5 in free bets + your £5.

Won nearly £30 and I've still got a £5 free bet :) I was really close to winning £40.

Don't they take back the free \$\$ you got after a while? They only give you that to make profit out of it right? And take it back when u reach the withdraw req. Or it's only some betting sites. Best of luck!

Yeah some sites do that unfortunately but i read the Terms and Conditions before i make an account and if I cant find anything about it then i check with the support.

Be aware that some websites have bonus conditions. For example, that you'll have to wager your

deposit + bonus for 30-40 times.

Maybe for sports less, just make sure read the terms and conditions :p

Sports betting is just as risky as any other type of gambling, since it's impossible to guarantee a specific outcome and specific metrics.

Like last night Barcelona lost 4-1 vs celta vigo. This is why i didnt win £80 from my £5 free bet. I was already £23 in profit so i thought that i would go for more money.

BUT because you're getting that bonus free bet money the risk is really low. Setting up a new business is risky, but people still do it. Without risk there is little reward.
