Thread: [Volkoff Web Based Crypter](#)

VolkoffHttp - September 21, 2015, 4:28 pm

Web based C++ crypter it is runtime and scantime FUD. I only encrypt native malware and I only accept clients that know what they are doing. You should know what you are doing so if you need your malware to be FUD for a long time this is the perfect service for you. This crypter is usually meant for people in the darknet.

This service has been tested with: andromeda, smoke loader, beta bot, diamond fox, zeus and neutrino.

Vouch copy for someone trusted.

Price: Test crypt: \$30 BTC, 1 month: \$200 BTC, lifetime: \$500 BTC.
