Thread: [Need Help Installing Tube Script!](#)

TheUnknown0 - September 21, 2015, 8:34 pm

I thought install a Tube Script was as simple as installing a Wordpress plugin. I dragged the extracted folder to the plugin folder, then went on Wordpress re-freshed the plugin and nothing new showed up. So I'm guessing installing a Tube Script to my wordpress is different? I looked up how to install it but nothing came up for my Tube Script. An I don't want to pay the Tube Script company \$50 just to upload it for me when it's probably simple. So here are a few pics of the Tube Script I am using maybe you guys could re-direct me where stuff goes or help me out atleast? Thanks in advance!!
