They are starting to come back

(Sep 23, 2015 06:00 PM)Silv Wrote: [\[CITE\]](#) What are the requirements needed

You need a domain and hosting. You need to find a way to get accounts to sell tho.

There is no need for vouch copies as I am giving out demo panel access if needed.

I can agree. I got a generator source for \$5 and it's similar to this one, does this source come with a gateway payment method?

"Stop trash talk without any proof"

Head over to your admin page, you'll crash.

Obviously it won't on the index page.. No accounts are displayed there.. ?

Appears that dude (<https://hackforums.net/showthread.php?tid=4882268>) didn't sold it otherwise he'd put his thread on close.

Review:

Overall Quality - 7/10 wish there was more features such as online account checker or mass alt adding.

Theme - 6/10 nice theme but it VERY overused and is used by all generators.

Code - 8/10 very clear and compact (have yet to find a vuln). Only thing I didn't like is the unneeded code.

Price - 5/10 mainly because he strictly only takes btc and it's a bit pricey considering it is a semi public source (many ppl use it)

Support - So far op is fair about purchasing and I have yet to need support

What I don't like:

I don't like how op is selling the source crypted (I had to pay much more for uncrypted)

And I don't like how we won't be getting any updates.

What I like:

Easy to use admin panel (at first it's a bit confusing but I got the hang of it within 10 mins)

Overall Rating:

6.5/10

It's an okay product for the price. It needs a ton of work before I would ever think about selling my product on it. (It looks way too overused atm)

Thanks for the review man.

Im glad I dealt with someone who actually know how to use it. Sorry you are unhappy about the account checker not being added and free update.

I will be adding the account check very soon. You will be the first to know about it.
