Thread: [VolkoffHttp / UID: 2872689 // Reselling a HF product for 3x the original price](#)

Sarcastic Desires - September 23, 2015, 9:31 pm

Hi.

So the user Volkoffhttp came into my attention due this thread:

<https://hackforums.net/showthread.php?tid=4998235>

Various of other members called him out already on it being a public/free script.

Now, this particular theme gets also sold by ?l??? ??t in this thread:

<https://hackforums.net/showthread.php?tid=4882268>

I notified Black cat about him, which black cat replied with:

<https://i.imgur.com/Ke2Jfv4.png>

<https://i.imgur.com/oP3p4AK.png>

<https://hackforums.net/showthread.php?tid=4882268&pid=47953684#pid47953684>

<https://hackforums.net/showthread.php?tid=4882268&pid=47954211#pid47954211>

The user VolkoffHttp claimed Black cat sold the project:

<https://i.imgur.com/z9wxmев.png>

<https://hackforums.net/showthread.php?tid=4998235&pid=47953646#pid47953646>

Just incase he removes his thread:

<https://i.imgur.com/ncEUrXf.png>

He's asking 3x times more than the original price, and 6x to decrypt the source.

Typical rip off.

Yup, he just modified black out product CSS. Obv a rip off.

VolkoffHttp - September 23, 2015, 9:39 pm

Lets clear some things up:

1. You are calling what I am selling a free/public script yet you are linking cats thread where he is selling it. So does that make him qualify for selling a public/free method. You sure are smart. Please link me where this was FREE and public.
2. I swore I had saw a thread where it was sold off to someone and I bought rights for him for \$200.
3. I have changed the code and I am adding account checker online, mass import and 2 more features so if anything its not a free public method as it has new features that ur so called public

method doesnt have.

4. You are just linking every post that doesn't really add to this report.

5. If you knew I contacted cat earlier today about the issue and he just responded to me right now.

6. Why would I remove the thread? but ok?

sure call me a rip off. You are just butthurt I knew how to manage the panel hold 10k+ accounts without lag?

I'm legitimately doubting if you've ever finished your primary school.

Where do you think I'm an user of that forum? Making up conclusions now?

However, my friend is a member of it, he got me that source from that forum.

DamienVC - September 23, 2015, 10:20 pm

Not to mention he is selling it without rights, thats blatant ripping.

If he bought it from a skid on XMPP, then he should have the brains to verify it. Not like - Ooh, wait, I'll just go ahead and DL the leaked version and make two IM accounts and act like talking to myself - selling myself ownership of a leaked product

Constructive reply:

Maybe it would be better for proof, like screen shots and time stamps of selling. Instead of just telling people the proof is somewhere on the internet, you just need to look for it and post it on your thread.

Best of luck with.. Whatever this is

Haha, first off selling a public eBook for \$200 (GG with your imaginary "I MADE TWO SALES TODAY") Only guy who bought it was scammed by you LOL

Then again, you dont know that there's something actually "coming soon" thats obviously gonna be better than VolkoffsHiTTP or whomever you proxy sold or multi accounted for.

"I am making a bot he or he group can never make" GG LOL -> You'll see ?

Anyways, get off the thread, sell more leaked shit, you need to make money! You are dependent on HF for income! ?

Even if it is leaked (that too the old source, before recode), previous owners as well as people involved in the transaction (middleman, etc) can confirm that ownership does indeed belong to Nex. ?

First off.

DO you have proof its public. I asked you to prove it. You never ended up coming out with it.

Also you tend to say a lot of things but we later find out you are nothing but a lie. Nothing about you can be trustworthy.

YEs go back to getting paid on days that don't exist.

Anywho I am ignoring this thread. Im not going to stoop down to these peoples levels as this just
