Thread: [IObit Protected Folder Password Cracker . Reseter - VB.NET](#)

iRuSTech - September 24, 2015, 6:53 am

Hello Guys ??

Today i will share a code that remove a file from IObit Protected Folder and making this shit to reset the password.

(WARNING : This Code is old the program may have update the pass path to AppData)

Removing Password CODE :

```
Code "    If System.IO.File.Exists("C:\ProgramData\IObit\Protected Folder\drawposs.db") Then
        Try
            System.IO.File.Delete("C:\ProgramData\IObit\Protected Folder\drawposs.db")
            MsgBox("Password Cracked/Reseted!", MsgBoxStyle.Information, "MadnessForCrack™
Says")
        Catch ex As Exception
        End Try
    Else
        MsgBox("Password Cracked/Reseted Already!", MsgBoxStyle.Information,
"MadnessForCrack™ Says")
    End If
End If
```

IMPORTANT :

Have to restart the computer in safe mode ???

(Hit there that the program have the problem) ???

Yeah ? Greetings from MadnessForCrack™

You've got an extra If terminator there. Oh and don't trap the exception if you don't intend to do anything with it. ?

1: I don't share the full code only this part

2: i trap it cause i don't want error messages if.

Also an answer is the 1. Everyone can put what he want in ex

?
