Thread: [\[GUIDE\] HOW TO BUY AN EBOOK! ||| PLEASE READ BEFORE BUYING AN EBOOK! |||](#)

Lizard. - September 25, 2015, 9:31 am

Hello there! My name is Lizardz!

No, I did not come here to trash any ones sells, just to prevent other people for wasting money on things that will not help them. In this guide I will be showing you how to buy Ebooks. Please read this before buying any type of Ebook.

So, the first thing you are going to look for is the user's forum rank and reputation. I will be using Fam for an example and his Doxing Ebook which is very well written and good for noobies. Whenever you buy a guide or a tool off of someone, you always want to make sure they are nice, have good support, and are very good at explaining to noobies and patient.

Fam's Profile: Picture [\(Click to View\)](#)

As you can see, Fam is part of two User groups "Echo" and "Axiom" so you can tell he's a pretty dedicated member from here since he was accepted for both groups. He also purchased L33t and Epic. His reputation is 200+ which is great. But still, check the comments in the reputation and what his negatives are.

Fam's Reputation: Picture [\(Click to View\)](#)

In this portion of his reputation, he has lots of positive reputation saying how he's nice, has great support, has a great doxing ebook, and does great tutorials. Plus out of his 230 reputation, he only has 2 negatives!

This is pretty basic stuff you should do to make sure you're not getting scammed or cheated. Also, I am not doing this because Fam asked me to or payed me to promote him. I've seen him around HF and he's a good guy.

Alright, so now you see that your seller is legit. Now you go to the thread. In this case it is located [here](#). First and foremost, read the full thread art. Fam is offering FREE support which is always good. Usually Ebook sellers have a more expensive plan for support which is BS. Any who, the price is very reasonable at \$10 since you can make quite a bit of money doxing people for other people.

Next you want to read the vouches on the thread. He only gave out TWO vouch copies so all the other ones are real buyers and all are positive! So, is that it, can you buy it now? Not just yet. Make sure to ask any questions in the thread that you have and see how the seller responds to you and how quickly they do to ensure you're getting what you want and need.

This Ebook Fam wrote is on Doxing and I've heard great things on it. I trust Fam and so do many, many people and I know he's a legit man which is why I used him as an example. Please be careful one who you buy from and also check how long they've been on HF and if they're just doing this to get money, not actually to benefit the HF community.

One last thing, DO NOT BUY MONEY MAKING EBOOKS. Again, not trying to trash anyone's sells but if you think about it, it's all just a scam. People usually say \$1,500 a week which is about \$72,000 a year which actual people get for doing REAL jobs annually. Plus, they say it's "Unsaturated" meaning it will never stop working. If it's never saturated, why risk it, sell it for a low

price on HF, if it's so valuable? Because it's easy money and people persuade you into buying it.

How do they persuade you into buying it? It's quite simple. They inspect element their paypal balances and put it to a high number and inspect element transactions to look very believable. Some even pay a guy to make a video on "How good it is". Do not fall for this. Money does not get in your wallet unless you work hard for it. You can't sit down for 8 hours and do nothing and expect to have \$500 in your paypal account by tomorrow. Please do not buy money making Ebooks. And even if you do, they will end up taking you a long time to figure out. Oh but wait! You forgot to buy premium package so you don't get support! Seriously, why wouldn't you include free support in all packages if that Ebook is worth sooo much money hm? Please never buy a money making Ebook and save yourself that money, thanks!

I hope this thread helped you guys when buying an Ebook here at HF. A lot of members are trusted and some are very sketchy. I just want to make sure no one here at HF is scammed, cheated, or confused. Please watch out for the Social Engineering freaks who will do anything to get what they want for you. Also, I am not saying all Ebooks are bad! Just money making Ebooks never fit out to their full expectation. Thanks for reading and take care!

Probably, but you'll most likely earn 1/8 of what they promised you in their super elite fancy art thread and what their "vouch copy" people said.
