Thread: [in need of a netflix account checker, source code, in vb to learn from](#)

?Yahellz? - September 26, 2015, 5:06 pm

in need of a netflix account checker, source code, in vb to learn from anyone that can help me thanks in advance and god bless you

Deez Nutz - September 26, 2015, 5:11 pm

You PMed me about this and I agreed to give one to you once I find the file and you go and post this. Why the need for this thread? ?

Odus - September 26, 2015, 5:13 pm

Make a request to your site which echoes a random account then display the response. If you want separate fields then split by the delimiter (usually a colon) and you got it.

Simples.

Security, on the other hand, isn't quite so easy.

You might want to check this in c#

<https://gist.github.com/MrTrvp/297bf6f4e464d6608319>

<https://hackforums.net/showthread.php?tid=4510288>

and use a converter to make it vb or compile it and then decompile it in vb from IL.
and use google and hf search.

YaBoii - September 27, 2015, 1:12 pm

i dont even lel topkek adasd as
