This tool is amazing! It's very well made and extremely unique.
I've personally never seen another tool like this in the market , and I love fresh ideas.

The developer is very skilled in the field of Java and quite franky I'm suprised no one else took this opportunity , it's an untapped goldmine!

Skype Domination functions brilliantly , it has the capability of messaging more than 50,000 people per minute.

All you do is use the Skype ID scraper , save the scraped Skype names , load them with Skype Domination , enter your message and hit start.

The recent update which added sleep / wait functions to Skype Domination prevent the inevitable ban that used to occur.

It also prevents the program crashing after 5000+ messages which is fantastic.

So , what can it be used for? Personally , I used it for advertising links to this website , which seems to have worked quite well , I was checking the analytics and received over 500 new visits within a 12 hour period.

That may not sound like much , but when you take into account that I only messaged 7000-8000 people , it's phenomenal!

It can also be used to spread malware too , although I hadn't tried personally , I did have a few ideas about how to spread efficiently with it.

But I think the main way consumers can benefit from this is monetization, you can use this for PPD / CPA and make some nice cash if you use it efficiently.

I thought I'd mention how simple it is to understand as well , I think there's only one button on the whole program , with only two tabs , one for the custom message and sleep time , the other to start Skype Domination.

Final Verdict

It's extremely well made , efficient and beneficial. Using this for an extended period of time and investing time into finding accounts / messaging will most likely leave you profiting.

It's affordable as well and support is quite wonderful , Skype Domination was made by a very experienced Java programmer who knows what they're doing.

I wouldn't hesitate to buy this if I didn't already own it!

Quote:This is a awesome tool to have. Allows you to send advertisements / any message to thousands of people with only a few clicks. One of the best tools I have used and will really help me with my future projects. 10/10 for this tool really easy to use and understand. Works brilliantly. Instructions are very easy to understand and everything is provided nicely. Takes only 5 minutes to do and all is needed is skype.

Worth the price 100%, amazing tool. Will save 1000s on advertisements. You can send any message to anyone.

To anyone interested, this will be one of the best purchases you will make.

Thank you very much.

I feel like if the messages are coming from the spammers account. It will probably influence the users to retaliate against the spammer by ddosing, doxing, maybe even trying to ban your skype.

I got a review copy of this program just now so I started it up.

The program seemed to work fine but the login is a bit messy.. Once done all the steps it becomes way easier.

The program opened and I just pressed start scraping, I went to get a sandwich and in the time I was gone it scraped 25k Skype names. WOW.

I closed the program and reopened it to start the spamming part. I RECOMMEND ANYONE TO HAVE A GOOD PC BECAUSE IT CAN GET A BIT LAGGY.

It send out a total of 23k messages and within 15 minutes I got 500+ replies back.

I want to give this software a big vouch!

Thanks for the Vouch and sorry about the bad Login stuff, but because its written in Java there are no (as far as I know) licensing systems so I had to create one by myself from scratch.

Okay, so I will be making a review about this tool during this week.

So far, I can say the scrapper is good. Here are my results when leaving this tool on while doing some other stuff:

<http://prntscr.com/9fc1we>

UPDATE:

I have scrapped around 62k skypes using the built in one while doing other stuff.

I definitely recommend using a fake skype account to do this. The spammer is very efficient and almost lag free. The login and key system which the user created is very nice as well.

On another hand...

I wish there was an option for the Number to spam to be added.

Overall, I rate this tool 8.3/10

Sorry for the late reply, had stuff going on at home.

What exactly is added in the major update ?

Seems a good tool, will consider buying :)
