Awesome virus bro. On a real note you should actually acquire some skills before trying to pull something off half-assed. What you shouldn't do is try to infect HF members, it's like the worse place to come. What happens if someone downloads it to their shit computer or virtual machine so they can install it and trace your IP? Then you get DDoSed that's what happens. So how about next time you just don't bother posting?

Mother fucker, its like you dont even try.

DO NOT DOWNLOAD
INFECTED LINK !

Sam Winchester - September 28, 2015, 10:59 pm

This file is INFECTED. If you downloaded it, run a virus scan on your computer immediately. You can also seek help for virus removal in the [White Hat Malware, Virus, and Rat Removal Help](#) section.
