Thread: [wordpress websites hacking service](#)

hammad - September 29, 2015, 1:01 pm

Hello Guys

i'm offering a private service, i have a critical vulnerability in many hosting companies (top french companies) which i can download any file from any wordpress website hosted in these companies, which mean i can access to the wp-config.php file which contains the database information so you can access the administration panel or shell the website or anything else you want

for now i can't say the name of the companies in public, but if anyone interested you can pm me or join me on skype : jean.spetnaz

i know i'm not active in the forum, so to be sure i'm legit, i need 2 trusted members (leet or ubers) to test the service for free and express their opinion :)

Vouchs

Pm'd you mate

screams - September 29, 2015, 7:25 pm

I would like the free service too. I can write a review too

FantaŠec - September 29, 2015, 7:26 pm

Is this using a symlink bypass on the servers of these companies..?

You're welcome mate :) and thank you for the vouch

i a m g o n e - September 30, 2015, 8:57 pm

Hey man this seems pretty legit, mind sending me an vouch copy? ill leave an review on the effectiveness on this product

If not, what is your asking price? ?[/code]
