Very nice contribution armada, glad to see so many HQ releases from legends

Sundance - September 29, 2015, 11:15 pm

Having trouble downloading with installer Armada Since I downloaded your other RAT Starter Pack as well Your installer wont install this pack.

Armada - September 29, 2015, 11:27 pm

Tested on numerous OS revisions, should be absolutely no conflict, especially in pack combination, they are treated as separated installations.

// Some site might flag the domains as malicious forcing you to clear the downloaded pack out of quarantine (Chrome is doing to me now)

It is also important to understand, you are installing Malware. You are literally requesting the package deliver malicious content to your system. THIS BEING SAID

Users must disable Anti viral agents.

I know, THE dude who rips on everyone for infection material is telling you to disable the AV and counter measure. With reason. you cant install the package without doing so. It can and likely will fail.

HATE BEING SOBER - September 30, 2015, 4:16 am

This is a DDoS pack with RATS and, crypters and binders? Which by the way none of those crypters work.

Merskiy - September 30, 2015, 5:11 am

The great pack. Get to download

exaction - September 30, 2015, 5:15 am

The great pack. Nice work.

Crocs - September 30, 2015, 5:39 am

I'm downloading it and will check it out, hopefully it's good. Thanks Armada.

Username checks out. ?

Hinch - September 30, 2015, 8:40 am

oh my fucking god :) LOIC kekek

SixInchesDeep - September 30, 2015, 8:43 am

OMFG WE CAN HIT DOWN 4CHAN WITH LOIC NOW

HQ as always Armada

Armada - September 30, 2015, 9:26 am

(Sep 30, 2015 08:40 AM)Hinch Wrote: [\[CITE\]](#) oh my fucking god :) LOIC kekek

In numbers that POS is actually useful..... dont laugh so quickly, 4chan btards knocked Mastercard, Visa and Paypal offline using just this BS.

Balding - September 30, 2015, 9:27 am

Mine is better.

USERS BE WARNED

- This file IS Malware, your Security software will flag and delete or purge elements of the installation, you MUST disable security software before install and add the folder exception for the software to remain on the system, these are "False positives" not actual infected files.

DamienVC - September 30, 2015, 9:37 pm

Thanks for this contribution, I'm gonna down some sites with LoIC ?

?S A T A N? - October 2, 2015, 1:35 pm

Hope it works, i will try it! Thanks!

sasibasasi - October 4, 2015, 4:55 am

I downloaded it and it seems to be the rat start pack

its not the ddos ?

Armada - October 4, 2015, 5:27 am

It took 2 pages of replies for someone to realize I posted the wrong link lol.

Will fix with the correct pack in a couple hours when I get home, my bad. ?

Fixed the Download link, now links to the correct pack. ?

1ashoo11 - *October 5, 2015, 12:20 pm*

so is it safe to download or not?
