Considering Fifa 16 has just been released.. I'd imagine a huge amount of players would be hungry for fifa 16 coins.

- 1.This service is probably using fake likes because they also get reach acc to my experience
- 2.Even if its real he might be using mass invites to get it and i am sure i can be better than him in this
- 3.Facebook page promotion is actually dead cause when you put link in post its reach decreases by 90% straightaway.
- 4.I target FB Groups not focus on building pages.

Traffic:

[img]<http://s29.postimg.org/upuo8mhcf/Capture2.png>[/img]

Leads:

Damn if i would have been living in US then conversion would have been sky high

By the way anyone know a dedicated ip US VPN or VPS

So in 24 hrs \$5.15 i guess promoting most saturated nice with doing only appx 3.5 min work is actually fine and today i did nothing at all

It doesn't matter if you are from US or Africa. It's all about your niche. Check names of groups in your niche. You said it's Clash of Clans Hack and groups for this niche have mainly PH and IN users. Check for example snapchat hack or microsoft points generator.

It totally matters when you have US accounts then when you search groups it gets most groups created in US so most members are US

Looking at the leads picture I think you don't get enough payouts with your networks, these 7 us leads should be 8 dollars or more, yes with considering mobile and all that and considering cr will likely stay same since these offers are generally easy.

I suggest switching the network and trying that too.

well, coc is pretty saturated and hard. I noticed posting in fb group's does not work that good anymore, there are too many spammers spamming now.
