Thread: [is my bitcoin wallet getting hacked ?](#)

Ted™ - October 2, 2015, 5:08 am

okay so this is the 4th time i get this email about my blockchain un authorized log in

Authorize log-in attempt

An attempt to login to your blockchain.info wallet was made from an unknown browser. Please confirm the following details are correct:

Time: 2015-10-02 11:29:43

IP Address: 66.249.81.226 (United States)

Browser: Robot/Spider

User Agent: Mozilla/5.0 (X11; Linux x86_64) AppleWebKit/537.36 (KHTML, like Gecko; Google Web Preview) Chrome/27.0.1453 Safari/537.36

Please check the ip address and browser carefully. If the above details are correct click the following link to approve the request:

surely not going to let anyone sees this link lol

If this login attempt was not made by you it means someone visited your wallet login page from an unrecognised browser. It may be an indication you have been the target of a phishing attempt and might want to consider moving your funds to a new wallet.

Perhaps you were on a VPN or something?

Just change your password and run a scan on your computer any way.

Also if you're not using 2FA you should enable it
