Thread: [Need Help with NanoCore - "NanoCore.exe has stopped working"](#)

IceY - Owned - October 2, 2015, 7:58 pm

PIC OF THE ERROR: [ht tp://prntscr.com/8n4tim](http://prntscr.com/8n4tim)

So I am trying out NanoCore and whenever I try to run the program I get this error. I have tried running both as Admin and as a User and have reinstalled .net framework. If someone can help fix this ill give a \$2 reward :P

[ht tp://prntscr.com/8n4tim](http://prntscr.com/8n4tim) (take the space between the ht and the tp)

^^ For bums

Also, have you actually re downloaded the NanoCore client?

Did you try running as admin? Did you get a data execution prevention (DEP) error?

OP, you should try adding NanoCore to the Data Execution Prevention list on Windows. That could solve your problem

SIM-2212192 - October 2, 2015, 10:58 pm

Disable all AV, run as admin and re-download
if problem persists PM Lazy
