Thread: [pDavy's In-Depth Beginners Guide](#)

PirateDavy - October 3, 2015, 2:50 am

Hi guys :D I'm making this thread as an insight to my method. I want to start making an e-book soon on my method. I plan to only charge 5\$ and it will be high-quality with audio clips of me (not a squeaker) guiding you through my method.

I honestly don't eWhore that much, that's why you probably see me active on here a lot. I normally only eWhore when I need to make some quick cash for something. So I'm not too worried about my method becoming saturated or overused :) but without too much talking, let's get into this.

My Method
And how I do it

YOUR GOAL:

You want to sell "your nudes" to horny guys online. It might sound weird at first, but you will understand eWhoring by the end of this guide.

What you will need:

Bluestacks with the old Kik (version 7.3.1.111) and Fake Camera and a picture pack

How to get these:

Bluestacks: Just Google Bluestacks, go to there website and download it. It's free ;)

Old Kik: Google "Kik version 7.3.1.111 apk" and find a reliable source to download from

Fake Camera: Google "fake camera apk" and find a reliable source to download from

A picture pack: You can find these for free all over this subforum. But the best ones cost money ;)

How to start:

1. Install Bluestacks first, enter your email and everything, then install the old kik apk and the fake camera apk

DO NOT INSTALL THESE FROM THE GOOGLE PLAY STORE

2. You want to set up your Kik account with a clean picture. Don't put some slutty ass pic because that will make you obviously fake.

3. Go to a traffic website. This is where you will gain your clients. To find these sites, do a quick Google search for things like "kik sexting" "sexting forums" etc. You want as many horny guys as possible.

4. Do not post anything about selling nudes on these sites. You will most likely be banned if you do. Just say something like "I'm horny" or "I'm bored".

5. You should be getting a lot of messages for about the next hour. Try to be talking to about 20 people at once. Adjust accordingly, as you should reply to each person in under 5 minutes (if you're a slow typer then maybe only text 10-15 people).

6. Have a little (2-4 message) conversation with them and, please, **ACT LIKE A GIRL!** Most people make their mistake here. Nobody wants to buy nudes from manly/boyish girl.

7. Bring up the question. You want to tell them something like "Actually I'm a little tight on money right now so I'm actually trying to sell nudes of me on here. If you would be interested then I can

take a clean live pic of my face so you know I'm real." but be casual. Nobody is going to pay you if you act all weird and money-hungry.

8. Identifying and getting rid of time wasters. If you start to get the feeling that this person does not seem like a paying customer block them quickly. If you want money then you should have no time for time-wasters.

9. Receiving payment. The most common methods of payment are Paypal and Amazon Gift Cards (AGC).

1. Make a Paypal under your eWhore's name and don't link your bank account/credit/debit card. When it asks you to just go back to the main Paypal site. Then when someone wants to send you Paypal money, just give them your Paypal email address

2. Make an Amazon account. When they want to send you a gift card they will have to send it to your email. You can either redeem it to your account or sell it in the marketplace section.

10. Now profit. If you followed these steps correctly then you should be making a nice bit of money by this point. Please see the tips below to maximize your income.

Tips:

1. As soon as you get that time-waster vibe, block them.

2. If they "just want to trade", block them.

3. If your Paypal gets limited (they lock up your account for suspicious activity) then contact them. If you have to call them then confidently say your name is your eWhores name and that the account is yours. An alias is not fraud. And say you need access to your account so you can pay for books/rent/whatever. Lying is not fraud.

4. If you have a question, ask it below. This is a thread for beginners so don't be scared to sound stupid. If you have a problem with this thread, state it below. If you have a common question, search the forums for a solution or Google it.

5. If eWhoring is boring or disgusting to you, listen to some music, you would be surprised how much it helps.

6. A VPN/proxy is not completely necessary but recommended

7. Don't talk to the horny guys too long. There are guys who will pay and guys who won't pay.

8. Don't waste your time with lesbians/girls. They normally never pay.

9. Make friends. Join a Skype group or something so you can ask questions to your fellow whores.

10. Don't be an asshole. If they don't pay then just block them. If you're rude to too many guys/if you act suspicious then you will only be hurting the eWhoring community. Don't do that.

DISCLAIMER: THIS IS FOR BEGINNERS

You can just pay most websites directly from your Paypal to the website. Or you can transfer the money (bit by bit) into your main Paypal ;)

EDIT: By the way, I really like the positive support :D everyone posting here so far is pretty friendly

Kerzic - October 3, 2015, 3:59 am

Some of this stuff is actually helpful.

James Burnham - October 3, 2015, 3:59 am

This is a nice guide. I am sure you can expand it in the future.

But if I remember well I cant spend the money I have in my PP account if it isnt verified :/ :)

PlayingBob - October 3, 2015, 4:04 am

Hello, I didn't understand the part when they lock your pp account, you tell them that you're real and that's it?

I've only made personal accounts so that's all I can recommend but I have heard that business accounts can reduce the chance of you getting limited. I would recommend doing some research on that before you set a business account up though.

No you can definitely spend the money without verifying it. That's what most people here do ;)

I do plan on making more advanced guides in the future for those who would enjoy that :)

I hope it is! And even though you might be well-versed in eWhoring, this is still a great thread to link to the people who ask you simple questions but you're too lazy to give them the proper links or too lazy to answer their questions in-depth.

I recommend keeping this one in your bookmarks if you don't already have a thread like this saved ;)

Yeah normally they will ask you to confirm some things and they might poke around and ask some other questions. Just make sure you have your Paypal info on standby and a list of excuses ;)

How can i check if my pic pack is saturated or not? Because i feel that its saturated but i dont know how to check it

Try reverse image searching some of your pictures in your picture pack. You can do this by going to Google images and hovering your mouse over the end of the search bar and clicking the camera. Then drag and drop your image in the box. If there are lots of results, then it's saturated ;)

When you download it make sure you set it to be opened by "Bluestacks APK handler" ;)
