Hi,

I can't access my Instagram account because of suspicious login attempt. As my account is locked and I would need a six digit numbers to access my account. Instagram sends me the six digit numbers to my old email which I deleted two years ago so I can't get the code. I been trying to email them but the support team does not reply to emails. I haven't had access to my account for the last four months. If you could help me to have access to my account that would be great. If could bypass the security that would be great.
