Thread: [Extension Spoofer & Binder & Scantime Crypter & Icon Chaner](#)

xeinebiu - October 4, 2015, 8:22 am

Hi Guys

I am sharing a project with you which i have used many times with my RAT Viruses.
It is able to crypt your Virus so it will make it Totally Fud (S C A N T I M E !)

How Does it Works ?

Select File you want to Hide. Reading all bytes of Selected File

Converting them to Base64 String

Encrypting Base64 String with Password

Writing Encrypted String to Stub

Select The Icon

Write Extension

Click Start Button Depending of Extension you have wroten , you must select a file with that extension.

File Selected , will be crypted same as your First File.

It will be writed in stub .

StubDecrypt String to Original State

Convert Base64 String to Byte Array

Writing Bytes to Hard Drive with their original filenames

Executing your file and second file Example : virus.exe & image.jpg

Stub.Exit

Stub Extension is : SCR not EXE ;)

Here it is an Preview of Program.

Thanks for the source!

But I still have yet to understand why you scanned on VirusTotal

xeinebiu - October 12, 2015, 7:19 am

But I still have yet to understand why you scanned on VirusTotal

Because i think there is no reason to mark this as virus ... Just my opinion ;) i know i should se
refud.me :)

Sutzi - October 12, 2015, 4:14 pm

Well done xeine, very impressive work sir.

baronbh - October 29, 2015, 4:59 pm

Amazing work, already test it and works really great!!!!

Adderall - October 30, 2015, 2:47 pm

Looks like a nice project, but please never use the blue "Hi guys" color again it hurts my eyes.

LilDurk - January 8, 2016, 3:01 am

Lol scanning on VirusTotal,
you dun goofd yourself bro.

bluntly - January 9, 2016, 11:17 am

It's sad you uploaded it to virustotal, but by replacing the encryption with another one and by changing the code i think it'll be FUD again :)! Very nice idea! :D You "simply" added the feature of not being recognized when using a extension spoofer, well done :)!

iLogic™ - January 11, 2016, 2:21 am

Never never never scan on VT. It is crypters killer (user razorscanner, anonscan, majyx insted). Btw nice work.

The code is very clean and i know about it bro , i know it too that it has no reason to mark this as virus because i know what i have wroten in that program code .

BTW THANKS
