Online for support, still fud and running.

Brother Mouzone - October 14, 2015, 11:19 am

If a future update is going to include dropping multiple files, the you have a customer here for a lifetime license given that it's often hard to know what OS you are going to encounter and, that I have a RAT that works native on mac and Windows, having a multiple file dropper would be perfect.

That way, you never have to worry about what OS you're going to encounter.

LUOIdRentA - October 14, 2015, 11:24 am

(Oct 14, 2015 11:19 AM)Brother Mouzone Wrote: [\[CITE\]](#) If a future update is going to include dropping multiple files, the you have a customer here for a lifetime license given that it's often hard to know what OS you are going to encounter and, that I have a RAT that works native on mac and Windows, having a multiple file dropper would be perfect.

That way, you never have to worry about what OS you're going to encounter.

I see what you mean, I'd definitely consider adding that, good recommendation.

(Oct 14, 2015 11:24 AM)Johnny Bravo © Wrote: [\[CITE\]](#) I see what you mean, I'd definitely consider adding that, good recommendation.

That is very cool - honestly, I was about to start looking round for a coder to make me a multi-file dropper as I need to eliminate the failure rate due to OS mismatch.

With multi-native host builds, a multi-file dropper is/would be a dream come true.

So, I am heading over to buy a lifetime license now ?

Nice work, sir!. Very nice work

banned212 - October 14, 2015, 12:56 pm

Did your crypter support Lum please i need to know?

This is not a crypter it is a file-dropper, and it will not have any persistence, it will only make your execution rate better because of it being FUD and lower file size.

Tostig - October 14, 2015, 1:24 pm

(Oct 14, 2015 01:22 PM)banned212 Wrote: [\[CITE\]](#) Please guys is there anyone that can tell me more about this dude crypter, Because i need quality that has good persistence that will enable my clients to always connect back to me on my LuminosityLink I want to know if this crypter support ll

This isn't a crypter, this is a dropper. Basically, it's good for keeping your file Scantime FUD. It's best to drop a crypted file, if you're going to drop anything at all.

banned212 - October 14, 2015, 1:33 pm

Please do u have any link were i can read more about this File-Dropper or if you can give me the full break down here

NoHax - October 14, 2015, 1:38 pm

(Oct 14, 2015 01:33 PM)banned212 Wrote: [\[CITE\]](#) Please do u have any link were i can read more about this File-Dropper or if you can give me the full break down here

It makes your stub 3kb and scan time FUD, when you run the stub it builds it downloads it from the direct link you provided and executes it in the background.

Brother Mouzone - October 14, 2015, 2:16 pm

Quote:Your suggestion is written down, welcome to the team ?

I had the same problem. Just try to change your hoster or check if the download link is broken.
Sometimes it happens when you are alrdy infected and the rat will block another rat.

SoCloseToToast - October 22, 2015, 10:50 am

So, when a user clicks the filedropper, does it autoexecute as soon as someone downloads?

NoHax - October 22, 2015, 11:16 am

(Oct 22, 2015 10:50 AM)SoCloseToToast Wrote: [\[CITE\]](#) So, when a user clicks the filedropper, does it autoexecute as soon as someone downloads?
It is like a normal file, it executes when you executes it (double clicks it).

LUOIdRentA - October 22, 2015, 8:52 pm

(Oct 22, 2015 10:50 AM)SoCloseToToast Wrote: [\[CITE\]](#) So, when a user clicks the filedropper, does it autoexecute as soon as someone downloads?
I explained the whole thing to you via PM

NoHax - October 23, 2015, 10:22 am

If you want to purchase, then go ahead!

CloseMe - October 23, 2015, 12:00 pm

IS the file native?And Is it codet in c or c# Or java etc?

The download link is a direct download to your stub.

The execute as is the name of the file in things such as task manager.

BubbleDoo - October 29, 2015, 6:13 pm

(Oct 29, 2015 06:07 PM)NoHax Wrote: [\[CITE\]](#) The download link is a direct download to your stub. The execute as is the name of the file in things such as task manager.

Yeah, I kinda got that. But why does it need a direct link? Why not just pick the stub from the PC. Should've put my question like that. :)

NoHax - October 30, 2015, 7:21 am

(Oct 29, 2015 06:13 PM)BubbleDoo Wrote: [\[CITE\]](#) Yeah, I kinda got that. But why does it need a direct link? Why not just pick the stub from the PC. Should've put my question like that. :)

That would require us to host your stub, which could be both exploited and would cost more.

We simply do it to keep the low competitive price.

Stixio - October 30, 2015, 10:00 am

Vouch for NoHax, this seems like a HQ product.

Ol' Dirty Bastard - October 30, 2015, 10:00 am

Well, basically that. What's the difference? Sorry for sounding a tad dumb but I've personally never heard of a dropper and the OP isn't that clear either tbh.

Also, you're comparing it with crypters in the thread design. Anyway, does this only make the scan FUD and not the runtime or what?

LUOIdRentA - October 30, 2015, 11:33 pm

(Oct 30, 2015 07:30 PM)BubbleDoo Wrote: [\[CITE\]](#) Well, basically that. What's the difference? Sorry for sounding a tad dumb but I've personally never heard of a dropper and the OP isn't that clear either tbh.

I'm not quite sure how you are confused with this but I will try my best to explain everything.

The program "drops" a file onto the disk of a computer, hence its name "File-Dropper". The user provides a direct download link to the program that they want executed, and then the File-Dropper will create a stub which will download the program from that direct download link, and then execute that file. File-Droppers are easy to make scantime FUD, we have only done one update so far for reFUDing the stub since this was released. It has been said multiple times across the thread that it is only scantime FUD. Only it's FUDness is being compared with Crypters as users might complain that their Crypter is not scantime FUD, where as this will stay FUD for a long period of time.

Here's a preview of the program in action which might help your understanding (it's a video demonstrating the latest update that was made rather than the actual use of the program, but you get the idea).

[Video: <https://www.youtube.com/watch?v=6L14b0zK2ZU>]

How many runtime detections does it get?

?asp3r - October 31, 2015, 5:22 am

Most file droppers will get runtime detections because of the essence of the software (dropping files). Best way I can think to combat this is not directly dropping a file but instead writing it's stream data to registry or running it in memory.

LUOIdeRentA - October 31, 2015, 5:51 am

(Oct 31, 2015 05:22 AM)Casp3r the Friendly Gh0st Wrote: [\[CITE\]](#) Most file droppers will get runtime detections because of the essence of the software (dropping files). This defeats the whole purpose of the file dropper; if you want that, then you'd buy a Crypter :P

?asp3r - October 31, 2015, 6:25 am

(Oct 31, 2015 05:51 AM)Johnny Bravo © Wrote: [\[CITE\]](#) This defeats the whole purpose of the file dropper; if you want that, then you'd buy a Crypter :P

You're miss understanding. The purpose of a crypter is to locally house the code encrypted in the stub. This is instead pulling the malicious file from a url and instead of downloading it directly into a file, saving its byte code to run as a file or save in registry so as to avoid scantime detection for the "dropped" file and possibly runtime detection as well.

It "drops" but not the standard method of dropping that any av's sandbox will instantly flag.

And of course you should still crypt the dropped file anyways for a higher execution rate. Because dropping a file thats already detected just screams malware.

LUOIdeRentA - October 31, 2015, 11:42 am

(Oct 31, 2015 06:25 AM)Casp3r the Friendly Gh0st Wrote: [\[CITE\]](#) You're miss understanding. The purpose of a crypter is to locally house the code encrypted in the stub. I understand completely, and I get what you're saying, but this was intended for purely being scantime FUD. Decreasing runtime detections might be an addition in the future which could be accomplished by what you explained.

NoHax - October 31, 2015, 3:36 pm

Hello sir

what's the role of Dropper ?

NoHax - December 8, 2015, 9:34 am

(Dec 7, 2015 09:02 PM)talal33 Wrote: [\[CITE\]](#) Hello sir
what's the role of Dropper ?
It lowers the file size and makes it scan time FUD.

Project [] - December 8, 2015, 12:43 pm
.NET 2 / 64 bit is required.

Does the stub has to be .NET 2?

Does the stub has to be .NET 2?
No, the stub can be anything, you can change it.
But the output will always be .NET

Vouch for NoHax. HQ user!

hedean - April 15, 2016, 4:14 pm
Is this thing still being supported? I've noticed the video was deleted from youtube. Could you upload it once more, please?
