I entered my real phone and they never called me or messaged me so I think you just can use fake informations.

It is "pending status" for 2 days after you registered the domain before you can use it.

Does this allow domain transfer or at least allow you to use your own host? Hostinger is cancer.

Knowledgeable - October 7, 2015, 2:45 pm

Hm... Some users have reported the same issue. Just try contacting their Support or use good fake info.

V3t3r4n - October 8, 2015, 10:42 am

Results on this seem to be very mixed.

I used real info and still got cancelled. They gave no reason for it.

Thank you for submitting a Ticket.

Knowledgeable - October 8, 2015, 11:17 am

i will stay tuned to the thread to see what they reply to you b/c im encountering the same issue and just haven't been home to open a ticket with them yet

Weco - October 16, 2015, 8:05 am

This Guide is still working.

V3t3r4n - October 18, 2015, 4:19 am

Little update on the tickets I sent:

They kept claiming the info I provided was incorrect (It wasn't). I sent a couple of tickets claiming it wasn't and how I could prove to them the info I input was legit. They closed my account.

So yeah, that was a waste of time for me.

[\$(5)\$] - October 18, 2015, 7:15 am

I got my domain within 24 hours. I think they're going to be offering this for a while.
