Thread: [This section has turned to a load of horse do do](#)

AppleNooby - October 5, 2015, 7:10 pm

All this is now is badvibes and his trickshot clan reking Manthe and his ghost crew over clients going back and forth arguing. I actually miss when it was just the hen clients atleast then you didn't have to listen to bullshit arguments over who's client is better, what features it has, the bypasses ect ect. This section should be about showing off your new exploits or new actual clients not your fucking ghost clients. Last time I checked trying to look legit in pvp isn't blowing shit up with your client and making kids mad because you're flying around them smacking them up. I think this section should be used to show off new exploits and bugs inside the game and learning to code.

Good fucking day if you actually read this.

Who's FaZe and who are the noobs in this situation. And what about OpTic.

Getsuga - October 5, 2015, 8:57 pm

Badvibes is still relevant?

Twixles - October 6, 2015, 2:12 am

I honestly hate posts like these more than anything else in this section.

This section has been a "load of horse do do" for a long time now.

Brian Williams - October 6, 2015, 4:30 am

yeah and also dont forget about the fucking stupid threads that keep on ranting about it. those really help.

Not really a rant just saying how stupid it had become and a suggestion of what it should become.

Just an opinion brother

Oh. I don't keep tabs on Optic, FaZe all the way. So who will rival faze now since optic is gone?

Team SRZ is kicking FaZe's ass atm. I think they're better than optic tbh. MaTiX is also pretty damn good, but not as good as SRZ. If SRZ dies too, I suppose MaTiX will step up next.

this place has always been shit no clue what made you think it used to be better

That's funny because everyone that's negged you or given you a neutral you revenge repped them back coming up with some bs reason to do it. Just by looking at your profile I can smell butt hurt. Go back to making threads about your shitty block game clients you greasy nerd.

This is my first time looking here in a while, it's shittier now then when there was 12937192 recruitment threads a day and that's saying something.
