Thread: [Hackforums lagging?](#)

Year - October 5, 2015, 11:53 pm

Is it me , or is HF starting to act up again. Every 10 seconds it keep saying 503- Site offline. Stop with this shit HF. My heart keeps breaking everytime yall try me with that offline bullshit. Stop! ?

??Whatever - October 5, 2015, 11:54 pm

It was down for me once, now has it been up for like, 5 min for me :)

Honeybun - October 6, 2015, 12:07 am

Pretty sure hackforums is getting attacked.

SIM-1676753 - October 6, 2015, 12:09 am

Quick, Omni is online! It's our time to strike!

problems.x - October 6, 2015, 12:10 am

I am currently having the same issue, sure it will pass by very soon though, it usually does.

Brendan - October 6, 2015, 12:11 am

The site has been experiencing some downtime.

Nothing Omni can't handle or won't resolve itself.

Year - October 6, 2015, 12:14 am

Shits annoying man. It keeps going out and in. Like no.... stay online please! This is my life. At least I can admit it , others cant admit it D:

420 Blaze It - October 6, 2015, 12:14 am

It's really annoying, but don't worry, it's stable, sometimes.

Like right when I write a post or send a message and click "Post Reply" or "send message"... it goes out. That shit ticks me off. I thought HF had cloudflare to prevent DDoS attacks.. ?

Brendan - October 6, 2015, 12:17 am

God, yeah I hate when that happens.

I type most of my posts in an external editor and just copy and paste it though, so it's not too big of a problem.

.Cynical. - October 6, 2015, 12:18 am

Im having this problem as well :/

That's true. I usually CTRL+A and CTRL+C every so often to have it in my clipboard.

Tony Stark - October 6, 2015, 2:12 am

HF does important backups and other maintainence jobs at around this time.

During this process, HF encounters some temporary issues until every thing is finished.
