P.S these are able to down all ovh and have custom methods coded in them.

Note: I will setup tftp and wget both so you get the max possible bots.

I will take a vouch copy and write a extensive review if youd like.

?hance The Rapper - October 7, 2015, 12:06 am

Torlus - October 7, 2015, 12:07 am

Surday - October 7, 2015, 5:25 am

It isn't exploit it is bruteforce to default servers.

ip:root:pass

ip:username:pass

B0ssMan - October 11, 2015, 11:13 am

Do you have a host that we could run the exploit off of?

Yes I can provide you a host too.

Dorrance - October 11, 2015, 4:57 pm

What pricing for everything and how many bots can the exploit bring in?

Torlus - October 11, 2015, 5:02 pm

This exploit can bring as many as you need it to bring anything over 10k will require a little work.

Lord_Doge - October 11, 2015, 5:03 pm

Give me a rough estimate of prices for different setups.

Dorrance - October 11, 2015, 5:04 pm

How long would it take you to bring in bots + the power of each 100 or 1,000 bots. And you never answered my question for everything how much.

100 boats = 2Gb

Dstat with 6k boats showed 136Gbps

The price is negotiable, you can pm me for it as it requires a lot of skills and hard work to setup don't lowball please.

U still go on sucking L0ki d1ck cos he cards servers for u skid ?

Please make it a little more obvious that it's him so I go make a new report for his new multi .

Also, do u see me selling any bots or anything related for the past few months ? Plz explain how this is some sort of competition in any way .

The only sales threads u will ever see me posting negative comments on are ur skid friends threads like this one, selling public shit like PMAs and leaked stuff that anyone can get for free.

You're such a fcking tool ???

Also, this thread is not even allowed to be posted here, it's SST related and you can't post these in Premium Sellers Section .
