Thread: [Aether Theme \[8 Controls\] \[GDI+\]](#)

Naywyn - October 7, 2015, 5:22 am

Hello there, I started to work on this and I wanted to share it because it's been a long time since I didn't released a public theme. This one is called Aether, don't ask me why because I don't know, I just wanted a name that sounds good and I found this one. Thanks to [Delirium™](#) (background image).

Here is a preview of the theme, there are property to turn TabControl texts to upper I didn't created headers for this one, tags are customizable etc.

You may use this theme in your applications or even sell your application with this theme as long as you give credits.

Here is the link: <http://pastebin.com/CyMHU90a>
Enjoy the theme.

exploit.c - October 7, 2015, 5:30 am

I admit, if you had a website with that similar theme that'd integrate pretty nicely. Good work.

N3oNight - October 7, 2015, 5:39 am

this is really good, like your other work.

Beatwin - October 7, 2015, 5:48 am

Really good work, it's very pretty.
Thanks man !

Odus - October 7, 2015, 6:20 am

Reminds me of that bootstrap web theme everybody uses.

P.S Typo in your tags. :P

Naywyn - October 7, 2015, 7:06 am

(Oct 7, 2015 06:20 AM)Odus Wrote: [\[CITE\]](#) Reminds me of that bootstrap web theme everybody uses.

P.S Typo in your tags. :P
Fixed, thanks. Thread updated. :)

Rhez - October 7, 2015, 7:18 am

That's what u call a webui.
What a creative mind you have. Great work.

Aristocles - October 7, 2015, 8:42 am

Nice UI here ! Good job ! :)

Naywyn - October 7, 2015, 9:10 am

Thanks for the feedbacks, really appreciate it.

VolkoffHttp - October 7, 2015, 10:04 am

This is pretty cool. Look what I used it for =D

\$lick - October 7, 2015, 11:03 am

Made some changes to the Circular control.

[Click Here](#)

Changes;PostText - For replacing the % sign

ShowMax - For showing Max value

HatchBirsh - For disabling Hatch Brush

Version for people who don't like hatch brush (The lines on the control)

[Click Here](#)

Circular Changes;PostText - For replacing the % sign

ShowMax - For showing Max value

HatchBirsh - For disabling Hatch Brush

CheckBox Changes;HatchBirsh - For disabling Hatch Brush

RadioButton Changes;HatchBirsh - For disabling Hatch Brush

Before/After Picture ([Click to View](#))

fLQZ - October 7, 2015, 11:57 am

nice work, looks great, keep up doing!

CYNTEX - October 7, 2015, 1:50 pm

You make the best themes :)

eCoLoGy - October 7, 2015, 2:36 pm

Great work as always with your themes.

OffCode - October 7, 2015, 3:18 pm

Very Nice theme! Thanks for release man! :)

WhyWork - October 7, 2015, 4:24 pm

Way to take themes to the next level aero! Very nice work as always!

.Cherry - October 8, 2015, 8:13 am

Do you use themebase for vb themes?

or how do i import it

SaketSaket - October 8, 2015, 8:27 am

(Oct 8, 2015 08:13 AM)4Hunnid Wrote: [CITE](#) Do you use themebase for vb themes?

or how do i import it

Just copy paste theme code in separate class & debug/compile... then use these custom controls the way you use normal controls... ;) Themebase is not needed for this theme...

@OP - awesome theme buddy ;)

.Cherry - October 8, 2015, 9:31 am

Getting this

<https://gyazo.com/48a38f2a945fda64ae8da005c63cc8a0>

Nvm got it to work really nice theme

bho007 - October 8, 2015, 12:37 pm

men your theme is really pretty cool

debug - October 8, 2015, 4:58 pm

Another great theme dude. Well done.

Kill?Muvz - October 8, 2015, 5:02 pm

This is an amazing theme, I like it a lot!

Devil Dog - October 8, 2015, 9:02 pm

Maybe someone can do c# conversion :)

Great theme!

CSGOClubhouse - October 8, 2015, 9:04 pm

This is beautiful, tbh 10/10. :)

SaketSaket - October 8, 2015, 11:32 pm

(Oct 8, 2015 09:02 PM)Devil Dog Wrote: [\[CITE\]](#) Maybe someone can do c# conversion :)

Great theme!

Just create DLL & use it in c# ;)

Zilog80 - October 9, 2015, 6:48 am

The theme is very nice, but completely unusable, at least on my PC using Visual Studio 2013 Professional Edition.

I only want to use tab control. So if you placed an AetherTabControl on your form the problems begin.

By default Dock property is set to Fill. If you set Dock property to None and resize the tab control to your desired size, nothing happens: When you run the app the tab control is Fill docking again :(

Problem two: if you want to change the ForeColor (R:52, G:56, B:67) or the BackColor (White) to another colors, nothing happens again, and that's sucks.

And finally some programming advices:

Do not make a public module. You may use friend or protected classes.

On your module you have a public enum called Direction. What if I have a previously public Direction enum on other module?????. Crash:

You should use Namespaces here. Some simple example:

```
Code Imports System.ComponentModel
Namespace MyHyperKoolTheme
Module Helpers
```

....

End Module

Public classes here

End Namespace

And finally, looking ColorFromHex function: Val? Mid? Hex?...Are you kidding me? This code seems a VB5 or VB6 from 1990 crap. If i'm not mistaken we are in 2015, with a very mature .NET framework. You should use this sentence instead that VB5 crap:

```
Code Public Function ColorFromHex(Hex As String) As Color
    Return Color.FromArgb(Long.Parse(String.Format("FFFFFFFF{0}", Hex.Substring(1)),
Globalization.NumberStyles.HexNumber))
End Function
```

Increment - October 9, 2015, 7:14 am

I keep getting an error when I add a listview to the form :

<https://gyazo.com/5f5fb185575f6d6d9d0852ef03283245>

Anybody got this error or know how to fix it ?

Zilog80 - October 9, 2015, 8:50 am

(Oct 9, 2015 07:14 AM)Increment Wrote: [\[CITE\]](#) I keep getting an error when I add a listview to the form [something here about 50 post NumberStyles]

Anybody got this error or know how to fix it ?

Same problem here!

But there is a worse news. You can accept this error message. The listview control is placed inside the tabpage control. But is completely useless.

On Form1, place a button and paste this code on Click event:

```
Code Private Sub Button1_Click(sender As Object, e As EventArgs) Handles Button1.Click
    Dim f As Form2 = New Form2()
    f.ShowDialog()
End Sub
```

Now create a new form called Form2 and place an AetherTabControl

Place an ListView control inside Tab1, accept the exception and then adjust ListView control position.

Now, on Form2 Load paste this crap code:

```
Code Public Class Form2
    Private Sub Form2_Load(sender As Object, e As EventArgs) Handles Me.Load
        PopulateList()
    End Sub
    Private Sub PopulateList()
        With ListView1
            .GridLines = True
            .HeaderStyle = ColumnHeaderStyle.Nonclickable
            .FullRowSelect = True
            .MultiSelect = False
            .View = Windows.Forms.View.Details
        End With
    End Sub
End Class
```

```
.Clear()

.Columns.Add("id", 20, HorizontalAlignment.Left)
.Columns.Add("test1", 60, HorizontalAlignment.Right)
.Columns.Add("test2", 60, HorizontalAlignment.Center)
End With
```

```
ListView1.BeginUpdate()
For i As Integer = 0 To 10
    Dim litem As New ListViewItem
    litem.Text = i
    litem.SubItems.Add(i)
    litem.SubItems.Add(i)
    ListView1.Items.Add(litem)
Next
ListView1.EndUpdate()
End Sub
End Class
```

Now run the app, press form1 button and show what happens 4 seconds later when ListView has been populated: yes another 'hide' exception on f.ShowDialog() line.

As I said before, very nice theme, but completely useless. I still prefer Metro UI fork theme (search on github dennismagno repository)

necromancerx - October 9, 2015, 9:11 am

A very very nice Theme :D :D :D

Naywyn - October 9, 2015, 9:16 am

If you remove those lines, everything should be fine.

```
PHP Code
<?php
Protected Overrides ReadOnly Property CreateParams() As CreateParams
    Get
        Dim cp As CreateParams = MyBase.CreateParams
        cp.ExStyle = cp.ExStyle Or &H2000000
        Return cp
    End Get
End Property
```

Adderall - October 9, 2015, 9:51 am

Good looking theme, you have made a lot of nice themes. Every time you release a theme it looks better than its predecessor. I hope there will come many more!

Naywyn - October 9, 2015, 10:00 am

Sorry for the inconveniences on this theme, I'll work on a new theme and I hope there won't be problems on this one.

Oliver Sykes - October 9, 2015, 6:58 pm

I swear, your themes just keep getting better and better.

edgekiller - October 10, 2015, 3:14 am

Fucking awesome ! Good job !

DarkNessCoder - October 10, 2015, 3:17 am

It's a beautiful Theme on Windows 10 ! Thanks for this Release !

Devil Dog - October 10, 2015, 3:49 pm

Here is the C# version of this beautiful theme

<http://pastebin.com/n1Rsp0yM>

Make sure to add Microsoft.VisualBasic reference to the project for it to work

FollowBoosters - October 10, 2015, 10:12 pm

(Oct 10, 2015 10:12 PM)FollowBoosters Wrote: [\[CITE\]](#) really nice theme great job ? hey you think could get the code just for the groupbox that would help me a lot thanks :)

The code is right there bruh...

```
Code Public Class AetherGroupBox
    Inherits ContainerControl
```

```
    Private G As Graphics
```

```
    Public Property Footer As Boolean
    Public Property FooterText As String
```

```
    Sub New()
        DoubleBuffered = True
    End Sub
```

```
    Protected Overrides Sub OnPaint(e As PaintEventArgs)
```

```
        G = e.Graphics
        G.SmoothingMode = Drawing2D.SmoothingMode.HighQuality
        G.TextRenderingHint = Drawing.Text.TextRenderingHint.ClearTypeGridFit
```

```
        MyBase.OnPaint(e)
```

```
G.Clear(Color.White)
```

```
Using P1 As New Pen(ColorFromHex("#F1F5FC")), B1 As New  
SolidBrush(ColorFromHex("#343843")), F1 As New Font("Segoe UI", 9)  
    DrawRoundRect(G, FullRectangle(Size, True), 6, P1)  
    G.DrawString(Text, F1, B1, New Point(12, 10))  
    G.DrawLine(P1, New Point(0, 36), New Point(Width, 36))  
End Using
```

```
If Footer Then
```

```
    Using P1 As New Pen(ColorFromHex("#F5F5F5")), B1 As New  
SolidBrush(ColorFromHex("#7A7E89")), F1 As New Font("Segoe UI", 9)  
        G.DrawLine(P1, New Point(0, Height - 35), New Point(Width, Height - 35))  
        G.DrawString(FooterText, F1, B1, New Point(12, Height - 27))  
    End Using
```

```
End If
```

```
End Sub
```

```
End Class
```

Schematic - October 10, 2015, 11:19 pm

Hey man, I noticed a problem with this:

Could this be your code having this issue? I believe mine is all right.

```
Code Private Sub Timer1_Tick(sender As Object, e As EventArgs) Handles Timer1.Tick  
    AetherCircular1.Max = SavingGoal  
    AetherCircular1.Min = 0  
    AetherCircular1.Progress = TotalSaved
```

```
End Sub
```

420 Blaze It - October 10, 2015, 11:19 pm

Looks really good, thanks for this OP!

Here a pic: <https://gyazo.com/b8c3982712de172f1d9e6a266669bec4>

Make sure you post the code in a

COMPLETELY empty class,

Which means there is nothing in the .vb file such as Public Class and shit.

ZxPwds - October 11, 2015, 2:55 am

Omg wow this is such a nice theme im going to use this now thanks :P

Diamondo - October 11, 2015, 5:15 am

This theme looks amazing. Good job AeroRev9!

St?lk?r - October 11, 2015, 5:15 am

Looks pretty good might use it in the future

BlackLayer - October 11, 2015, 11:32 am

Amazing your GDI looks sexy bcs it's my favorites. thanks you much. ?

Rockofello - October 11, 2015, 4:39 pm

I have been using the Aether theme for quite some time and every time I install it. I'm not able to use ListBox, Progressbar, ListView, and TextBox Toolbox items in Visual Studio 2013/2015 I wondering if someone would mind taking a look and seeing why it breaks everything.

Error that pops up is "Parameter Incorrect" and happens in System.Drawable

Doesn't show any code compiles fine but breaks when form starts

PasteBin: pastebin.com/d6Zzx4sR

THIS only happens when I use the items on the TabControl

Odus - October 11, 2015, 5:07 pm

Rockofello, I merged your thread to the Aether thread since OP is more likely to see your problem along with others who might also be looking for the same answer.

Rockofello - October 11, 2015, 7:22 pm

Thanks alot! :) Much obliged.

Oliver Sykes - October 11, 2015, 8:29 pm

If the tabcontrol has doublebuffering enabled or in Controlstyles or Createhandle/OnCreateControl, try removing it. Just a possible solution, as it breaks tabcontrols for me.

TRH4CK - October 11, 2015, 8:34 pm

Damn :O

This looks way too much very good tbh!

Rockofello - October 11, 2015, 9:43 pm

Unfortunately that did not help either. I don't understand why its' breaking all the good ToolBox items.

nazist - October 11, 2015, 10:58 pm

thank you very much sir..pretty cool

Rockofello - October 11, 2015, 11:14 pm

Can anyone tell me why I cannot use the Theme it is breaking my application whenever I add a TextBox, ComboBox, ListView, ListBox etc... Error in System.Drawable.Error: Parameter Is Invalid
The error is occurring in the TabControl

Code <Global.System.Diagnostics.DebuggerStepThroughAttribute(> _
Protected Overrides Sub OnCreateMainForm()
Me.MainForm = Global.WindowsApplication1.Form1 ' Breaks HERE
End Sub
Everyone using the Aether Theme can fix the bugs and have it look exactly the same just by switching the Xylos Tab Control and the Aether TabControl Finally got it working thanks for this theme!!!! Saved me

Fixed!!!!!!SOLVED!!!!

Rockofello - October 13, 2015, 4:46 pm

Too add bottom border lines use this code :)

Code Using P1 As New Pen(ColorFromHex("#3B3D49")), P2 As New

Pen(ColorFromHex("#2F323C"))

G.DrawLine(P1, New Point(Rect.X - 4, Rect.Y + 1), New Point(Rect.Width + 4, Rect.Y + 1))

G.DrawLine(P2, New Point(Rect.X - 4, Rect.Y + 2), New Point(Rect.Width + 4, Rect.Y + 2))

End Using

All you have to do is replace the AetherTabControl code with the code provided

Code Public Class NewAetherTabControl

Inherits TabControl

Private G As Graphics

Private Rect As Rectangle

Private _OverIndex As Integer = -1

Public Property FirstHeaderBorder As Boolean

Private Property OverIndex As Integer

Get

Return _OverIndex

End Get

Set(value As Integer)

_OverIndex = value

Invalidate()

End Set

End Property

Sub New()

DoubleBuffered = True

Alignment = TabAlignment.Left

SizeMode = TabSizeMode.Fixed

ItemSize = New Size(40, 180)

End Sub

Protected Overrides Sub OnCreateControl()

MyBase.OnCreateControl()

SetStyle(ControlStyles.UserPaint, True)

End Sub

Protected Overrides Sub OnControlAdded(e As ControlEventArgs)

MyBase.OnControlAdded(e)

e.Control.BackColor = Color.White

e.Control.ForeColor = ColorFromHex("#7C858E")

e.Control.Font = New Font("Segoe UI", 9)

End Sub

Protected Overrides Sub OnPaint(e As PaintEventArgs)

G = e.Graphics

G.SmoothingMode = Drawing2D.SmoothingMode.HighQuality

G.TextRenderingHint = Drawing.Text.TextRenderingHint.ClearTypeGridFit

```

MyBase.OnPaint(e)

G.Clear(ColorFromHex("#33373B"))

For I As Integer = 0 To TabPages.Count - 1

    Rect = GetTabRect(I)

    If String.IsNullOrEmpty(TabPages(I).Tag) Then

        If SelectedIndex = I Then

            Using Background As New SolidBrush(ColorFromHex("#2B2F33")), TextColor As New
SolidBrush(ColorFromHex("#BECCD9")), TextFont As New Font("Segoe UI semibold", 9)
                G.FillRectangle(Background, New Rectangle(Rect.X - 5, Rect.Y + 1, Rect.Width + 7,
Rect.Height))
                G.DrawString(TabPages(I).Text, TextFont, TextColor, New Point(Rect.X + 50 +
(ItemSize.Height - 180), Rect.Y + 12))
            End Using

        Else

            Using TextColor As New SolidBrush(ColorFromHex("#919BA6")), TextFont As New

arti110 - December 7, 2015, 1:17 pm

Awesome theme but I have one question. How can I add an icon at tabcontrol?

Nikola ?esla - December 8, 2015, 6:05 am

Getting this issue please help :)

Nyan_Meow - December 8, 2015, 10:34 am

Try deleting that line(s) of code and re-build it.

Nick (Name) - December 14, 2015, 6:31 pm

I would love to know where you get your icons for the tabcontrol, I can't really find a uniform icon pack. If you could direct me to a site or way of getting these type of icons, that would be much appreciated! :D

Edit: Nevermind, found a good site for vector icons! If anyone else wants them check out this site:
www.flaticon.com

4h35i13n46u7 - December 15, 2015, 10:02 am

'Do you like this theme?

Yeah("I like it berry muchh!", MsgBoxstyle.Information, "TRUE M8") = Awesome!

'Thanx for sharing! (y) :)

Nullout - December 21, 2015, 9:26 am

(Dec 7, 2015 02:17 PM)arti110 Wrote: [\[CITE\]](#) Awesome theme but I have one question. How can I add an icon at tabcontrol?

Add a ImageList -> Click your TabControl, go to properties -> Click on "ImageList", and choose your imagelist -> Go to one of the pages, click on properties, and add an icon that you have in your image list. :)

AimBRoT - December 22, 2015, 3:26 am

For those guys that have problems adding ListViews and other controls within the TabControl...

Search for "Public Class AetherTabControl"

scroll down till you see

'Protected Overrides Sub OnControlAdded(e As ControlEventArgs)"

Remove the whole sub (by commenting it out or whatever) and recompile your project.
Now everything should work fine :)

Edit: Btw, very nice theme :3

Celaris - December 23, 2015, 9:04 am

Can I get a detailed explanation on how to import this? I'm new to this and i've read a few others on how and its confusing on what to press and so on. Thanks and great theme!

CoderEX - December 23, 2015, 1:05 pm

Create a new class file within your project (Right Project ---> Add ---> Class).

Then delete everything in the class file (CTRL + A and then press Backspace).

Then copy and paste the theme's source into the class file.

Then click build, and the controls should appear.

Visual Freedom - January 2, 2016, 11:15 am

Awesome theme. I think I will use it in one project in the near future.

Visual Freedom - January 13, 2016, 11:54 am

Check another app using a modified version of your theme:

gky159 - May 9, 2016, 12:34 pm

hi this theme is awesome but can you tell me how can i use it for c# i tried online vb.net to c# converter but its gives alot error

Lexus™ - May 10, 2016, 12:49 pm

thanks for creating this theme :) i just used it on my free crypter <3

Rosey Mutiny - May 23, 2016, 9:55 pm

Seriously in love with all of your themes. Keep up the good work.

#Kat - May 24, 2016, 5:37 pm

used this theme for my penis enlargement simulator good shit :)

gilles - June 24, 2016, 12:56 pm

Gives me an error...

CompomentModel Not Found

Help???

jhonth0r - June 24, 2016, 6:57 pm

Help???
just delete it ?

Mew? - June 24, 2016, 9:32 pm

Damn this theme is so sexy I may have to redo one of my projects and use this

Demoralise - June 24, 2016, 11:20 pm

Did you develop this with Bunifu.NET?

https://www.youtube.com/watch?v=tggKd7l7_s8

..wat?

Why would you purchase a separate \$50 tool when you can easily manually code something like this with .NET's GDI+?

Zedz - June 24, 2016, 11:45 pm

thanks for the theme bro! i hope to use it and give credz

JavaDriveBy - June 25, 2016, 6:21 pm

Wow this look awesome, thx for share :)

Type R - June 27, 2016, 8:48 am

Looks pretty sick bro as someone else said if this was a website theme it would look hella nice. But great work anyway bro :) 9/10 from me.

nullkid - July 2, 2016, 1:04 am

Would you mind listing the icons you used?

ExpiredNumber - July 2, 2016, 1:05 am

god teach me how to make something like that lol

Hoody - July 4, 2016, 12:03 am

Why in the fuck would you pay \$50 for that... make it yourself in less than a day lol

breaker1911 - July 18, 2016, 10:38 pm

already di foudn it at the thread hehehe
sry

Essence - July 18, 2016, 11:31 pm

Thanks for the share, looks dope man! I will try to make this some type of use in my later projects man!

Thanks again =D!

\$lick - July 19, 2016, 8:31 pm

(Oct 10, 2015 11:19 PM)Schematic Wrote: [\[CITE\]](#) Hey man, I noticed a problem with this:

Could this be your code having this issue? I believe mine is all right.

```
Code Private Sub Timer1_Tick(sender As Object, e As EventArgs) Handles Timer1.Tick
    AetherCircular1.Max = SavingGoal
    AetherCircular1.Min = 0
    AetherCircular1.Progress = TotalSaved
```

End Sub

You are doing 50 out of 100,000 not 50%.

Xzity - July 22, 2016, 6:45 am

Really want to use it, but I get common errors.

fixed // just deleted the component errors

ZangaGod - September 11, 2016, 9:31 am

wow this is really cool, also this is the only theme that worked :D +rep

kuyaMacoy - October 5, 2016, 6:55 am

Please help me , im having a problem with xylos theme

Error 1 'ComponentModel' is ambiguous, imported from the namespaces or types 'System, System.Windows.Forms'.

Please help guys

elaichyou - October 17, 2016, 4:11 pm

Great work thanks a lot Respect

Ray Palmer - October 18, 2016, 12:00 pm

Thanks a lot dude ! i m going to check this out great work

Troep - October 19, 2016, 7:16 am

theme dont works :(

<https://imgur.com/a/imzuJ>

BoliBerrys - March 16, 2017, 8:28 am

I like the way the circular progress look.

Good Job

ghzt2 - March 16, 2017, 2:25 pm

Really nice, looking fresh! ?

shiroze - July 13, 2017, 7:04 pm

(Oct 7, 2015 05:22 AM)Naywyn Wrote: [\[CITE\]](#) Hello there, I started to work on this and I wanted to share it because it's been a long time since I didn't released a public theme. This one is called Aether, don't ask me why because I don't know, I just wanted a name that sounds good and I found this one. Thanks to [Delirium™](#) (background image).

Here is a preview of the theme, there are property to turn TabControl texts to upper I didn't created headers for this one, tags are customizable etc.

You may use this theme in your applications or even sell your application with this theme as long as you give credits.

Here is the link: <http://pastebin.com/CyMHU90a>
Enjoy the theme.

How to Add Icon in the Tab control ? from design or using the code ?

karthiksba23 - December 7, 2017, 11:15 pm

I gets many errors like autoscaledimensions' is not a member of windowsapplication1 vb.net and Error 4 'ComponentModel' is ambiguous, imported from the namespaces or types 'System, System.Windows.Forms'. like this totally 9 errors coming. Please help me to solve this errors bro.

Thanks & Regards,
L.Karthik

B0RU70 - March 25, 2018, 7:25 am

This is really good, like your other work.

th3s3cr3t0n3 - March 26, 2018, 1:54 am

Great theme man very nice. May use this in one of my programs I have a web version for but considering a desktop client.

ouu11 - May 13, 2020, 9:51 am

Whenever I try and use TabControl, it goes back to it's default colour - white. Any fixes?

#Kat - May 14, 2020, 11:21 am

(May 13, 2020 09:51 AM)ouu11 Wrote: [\[CITE\]](#) Whenever I try and use TabControl, it goes back to it's default colour - white. Any fixes?

option 1: set it at runtime

option 2: edit rgb line for the color
