Any suggestions?Yes i can provide Loader for DDoS, but like i have blocked multiple deals in past because customer want Botnet only for DDoS. I don't like setup any Loaders simply just for DDoS, its 100% waste of money & time to DDoS with real Wintoy bots. DDoS can be handled with multiple ways what are lots of cheaper and more effective methods than HTTP Loaders.

If you still want HTTP Loader only for DDoS purposes, we can talk about it. ?
