Hello everyone,

It's been a few days since I've given anything out to any of you guys and I'd love to continue to do so on a regular basis.

I've personally found a free web-based crypter in which I've ran a virus scan on with 3-5 different sites.

If you would like a free web-based crypter that you can use or even just test out, post below and I will contact you within 24-48 hours with the website's direct link.

Hope to speak with you soon.
