Thread: [How to portforward on AT&T uverse \(Not Allowing programs but the real way\)](#)

ACESLIMZ - October 8, 2015, 4:57 pm

Trying to find this crap out on youtube and i cannot find it, someone help me out

WTF¿ - October 8, 2015, 5:10 pm

Log into your router's home page and find the pf settings, it's normally very strait forward (Get the pun??).

ACESLIMZ - October 8, 2015, 5:19 pm

that is a nice vpn but im trying to find something free and getting this working lol

Ninjanasty - October 8, 2015, 9:49 pm

What kind of router do you have when you going to your gateway page

Incendiary. - October 8, 2015, 10:44 pm

Buy a VPN,
More secure, easier to use and better in general.
RA4W or 143 are both good.

spyke8x - October 8, 2015, 10:53 pm

You have to add it in as a custom service. It's on the NAT/Gaming page.

Won't even put up \$2.50 for your own safety? That's sad.

DamienVC - *October 9, 2015, 5:03 am*

Try a VPN.

143VPN or RA4WVPN.

?
