Thread: [URGENT!! KiK Live picture.](#)

BuyingSpade - October 9, 2015, 8:56 am

So I got a victim at this very moment who has more or less agreed to everything but wants a Livepicture as a confirmation that I'm real. I believe I saw a methode once where I'd be able to send a Livepicture without exposing myself as a fraud.

Can anyone help me out? How do I get this through.

Step 1. Download BlueStacks

Step 2. Download Kik

Step 3. Download Fake Camera

Step 4. Send picture via camera and select Fake Camera app.

Step 5. Locate the picture on your computer

The end

A live picture just means one from camera. Use the Fake camera app and just choose a selfie or something that isn't a profile picture or one you've used.
