You should probably contact the seller which you purchased it from if you want help with it, chances are he knows what he's doing.

- Just a heads up, probably should know some knowledge on what you're purchasing.

It isnt actually an "exploit" if it compiles to a vbs script.

You should try a better reliable silent exploit; <https://hackforums.net/showthread.php?tid=4944806>

ok if im not mistaken,the vbs file right click on edit. Copy the contents,now head to word document/customize ribbon/enable developer/click on visual basic and paste the contents of the vbs. Save document....hope it helps,thats as simple as i can explain.
