Not much information, I know a similar method but it is not the same one as this.

The method is greyhat and you might get your acc closed anytime.

He told me you just have to rinse and repeat when that happens.

I guess it could work if you are able to change locations using a vpn or whatever.

The method has a lot of potential and is only half a page for the vouch copy (nice and short).

However like the user above said you could get your account closed.

The method can earn up to a lot of money and profit and the best part is there is no investment needed.

Why are you selling an e-book when you have 5 rep and 100 posts?

Please note it was short because of a vouch copy. The real one is bigger, but yeah what he said is true :) Thanks.
