Thread: [Reasons Why To use Gyft for AGC](#)

Great Suggestion - October 10, 2015, 8:36 am

The reason i think everyone should transition to Gyft is simple, its fast you get the code immediately, and you dont have to deal with the hassle of the person saying "just wait for the email, send the stuff", on numerous occasions i never received the email or it took so long that the person lost interest, i still got the money but still im just saying.

With gyft they send you a screenshot of the redeem code, and then youre good because they can just click redeem and you get it immediately.

Amazon Gyft Cards ?

Mikael Blomkvist - October 10, 2015, 8:55 am

I agree, but Gyft is a pain in the ass for newcomers, because of the antifraud protection. One must wait around an hour to purchase on Gyft with Paypal for the first time (a high amount i mean), and that really makes it a waste of time for costumers and sellers. Yesterday, one dude said "I'm sorry, i don't know that site and I'm not entering my credit card details there" WTF -.-!

I guess the site has been used by noob carders, so they are taking those lame precautions. I would like that everyone used it though.

Its totally upto them how they wanna pay, not upto your choice. If force about using a different payment system, they will just loose interest unless they are pathetic.

Youre totally right but i've persuaded my fair share

420 Blaze It - October 10, 2015, 9:34 am

Gyft is so easy to use and Its definitely safe!
