Thread: [Animate this to switch between black and red?](#)

•Neon - October 10, 2015, 9:31 pm

Hey HF, this is way out of my very low skill level for GFX, so if anyone has the time and ability to animate this to switch between black and red (like my avatar except just two colors), may you please do so?

It'll be very much appreciated.

I like this design, so here's what I request to be animated:

^ ew I just realized it has a white outline.. if anyone can attempt to remove that, that'd be nice. You don't have to, you don't have to do any of this, just a quick request :)

That's correct. I have absolutely no clue how to animate and save it, sounds really complicated.

I believe the old thread was junked, it was a user who's active in free graphic requests, though. They're good at what they do :)

I'll try to find that out for you.

Couldn't get background to be transparent, sorry. This is what I got though.
