Thread: [making a python script run cmd command on windows](#)

jackharper - October 11, 2015, 2:15 am

Hello Friends

I am learning python language for 2 weeks now

i was curious that can we write a script wchich can run a cmd command on windows

like we defince a fucntion and usualy say print

instead of print how can we make it run cmd command.

thanks for help

PHP Code

```
<?php
import os
os.system("dir") etc..
```

```

diretory to what..?

lets just say we want to shutdown pc through python script with cmd command

what will that be..?

Than, shutdown of course .. try it before u ask anything ..

PHP Code

```
<?php
os.system("shutdown now -h")
```
