Thread: [\[LEGENDS\] Official Recruitment - Network Exploitation and Programmers!](#)

Armada - October 11, 2015, 6:36 am

Do YOU have what it takes to be Legendary?

Legends is recruiting Talented Network Security Experts and Coders!

"Others toil their entire lives to make a name for themselves, some are just born LEGENDS."

Legends is a diverse group not fixed on a particular agenda. Marketing, programming, hacking, you name it - but only people who make the cut will be accepted. We strive to contribute, teach and learn as individuals. We do not consider prestige or reputation to increase any chances of getting in Legends. We expect high quality members willing to contribute to our group as well as the community - we always welcome such members wholeheartedly.

We do not consider rep, awards, prestige or status to be a deciding factor. You must be willing to be an active member of the group and participate in group activities & contributions. We do not endorse inactivity within the group. Please revise your application before posting it. We expect applicants to be truthful in their applications. Do not contact the leaders or the group owner regarding the status of your application. Applying via userCP instantly gets you into the groups' blacklist. Selected applicants will be interviewed through Skype or any IM service of their choice. Good luck to everyone who intends to apply!

Do you have what it takes to be a Legend?
Apply within!

APPLICATION

Failure to apply within the specified format will result in immediate disqualification of application. - If you can not follow a posting format, we wont consider you to be able to follow group rules.

This is not a blind application process, We are recruiting only the most qualified of members, whom can provide proven portfolios of accomplishments.

Potential members whom wish to apply are advised to build a professional portfolio of proven background experience for the group to make a determination on. Your site reputation and "credit" goes nowhere here, we will base this entirely on your proven demonstrated abilities, so get those portfolios together for show!.

APPLICATION FORMS

Provide us the portfolio of accomplishments. I am providing no "Standard cookie cutter" format, because this is your opportunity to make an impression on us for acceptance.

Good luck to all applicants. However, please be advised only those selected will be contacted for entry to group. Do not PM staff leadership or members to inquire on your application, if you posted within this thread, will will review it.

IMPORTANT NOTE: Legends is a privately funded group, any requested work (programming requests, for example) will always be compensated financially for all efforts. We don't request anything or expect it to be done freely. All efforts will be based on a group effort and towards a group focus, however we understand nothing is free, especially user time. Financial compensation will always be provided on discussion of projects.

Inj3ct0r? - October 11, 2015, 6:38 am

Great group to be in. A great opportunity for all the deserving members.

Grievous????? - October 11, 2015, 6:40 am

Some nice members in this group!

Too bad I'm blacklisted, but gl to all ?

NoHax - October 11, 2015, 6:41 am

This is hopefully going to be sick, apply while you can!

The GRim - October 11, 2015, 6:43 am

Just remembered that I have 2 vulns to sell lol.

Good luck with the recruitment.

Ghost Writer - October 11, 2015, 6:49 am

the title says you're looking for web hackers and programmers but the thread says you're looking for network security experts and coders, those are two very different things?

Raymond Reddington - October 11, 2015, 6:53 am

Good luck to everyone who apply. Remember we are looking for members with particular skill-sets.

Looking forward. ?

Armada - October 11, 2015, 6:53 am

(Oct 11, 2015 06:49 AM)Ghost Writer Wrote: [\[CITE\]](#) the title says you're looking for web hackers and programmers but the thread says you're looking for network security experts and coders, those are two very different things?

Web hackers qualify as network security as they must penetration test servers and work exploitable code.

Coders are programmers?

Devsoft™ - October 11, 2015, 6:56 am

I suggest using this chance while its here. This is a rare chance for you.

Jesse Pinkman. - October 11, 2015, 6:57 am

Who am I?

Apply within!

Hello, my name is IntersectNo1 and I am a student living in Australia. In my free time I hang out with friends, chill on HF, code, play piano and play video games. I have recently got an interest in coding and am loving learning C++ as a first language. I have picked it up relatively quickly.

What makes me a Legend?

This is a tough one as I don't think i can self proclaim myself as a Legend. But, I shall try. Some of my attributes is that i am an extremely quick learner and once i dedicate myself to something i will continue until I succeed. Another Legendary attribute I have is my Loyalty. I am a Loyal person, if i'm giving you my Loyalty, i'm expecting it back. I think if there is on thing that makes me a Legend and makes me a good fit for this group is that i love to help people. I legitimately love helping people. I will ALWAYS do whatever i can to help people. I have noticed Legends loves helping this community and i know i would be a good fit i will help in any way i can. Since i am a very active user here on HF i will be on alot of the time.

What Skills do i have?

My main skills would be coding/programming. As i am quite new to it as i have stated before i am learning quite quickly. I have started learning C++ and am about to start learning HTML, Java script and angular. I would be able to benefit Legends once i have hit my potential. I don't know how soon this will be. But every step of the way, i will be here showing my knowledge to people who don't know as much and learning of people who know more.

EDIT: <http://tinyurl.com/IntersectNo1> Just got bored made this for you guys

Virus total: Spoiler ([Click to View](#))

Apparently it has 3 hits, no idea how. Just compiled it then...

P.S: apparently i am too tired to make this application pretty.

Armada - October 11, 2015, 6:58 am

(Oct 11, 2015 06:54 AM)The GRim Wrote: [\[CITE\]](#) No it doesn't lol. Seems like you have no idea about what you're talking.

You can feel free to split hairs all you wish. I am not interested in creating a debate over this. If you have no interest in application as per the thread, why post?

Mad76e - October 11, 2015, 7:52 am

(Oct 11, 2015 06:53 AM)??m^aDa Wrote: [\[CITE\]](#) Web hackers qualify as network security as they must penetration test servers and work exploitable code.

Coders are programmers?

I wont fight over this, but he is correct.. There's a big difference.. You can see me as a kind of network security tester or something like that, but i wont for all gold in the world do things as LFI,

RFI, SQLi, and shit.. But the apache server might interest me or other tings running on that specific server on other ports than port 80

Armada - October 11, 2015, 8:06 am

(Oct 11, 2015 07:52 AM)mad76e™ Wrote: [\[CITE\]](#) I wont fight over this, but he is correct.. There's a big difference.. yeah coders are programmers but web hacking and network security are two complete different topics lol they dont qualify.

anyway i see you changed the title so i guess so... ;)

@NEGRO - October 11, 2015, 11:33 am

Introduction: I'm a 17 year old senior in high school, pretty astute student (34 ACT, 13 AP classes under my belt, 3.8 unweighted GPA - I can verify this obviously). I'm currently an aspiring MC; I have invested around 3500\$ into my current basement studio from the money I made on this forum into a little studio setup in my basement. I used to be an avid gamer and with it came a lot of coding and programming knowledge; I had to write simba scripts for RuneScape and help debug iDungeon for Kiko and was very integral in the RuneScape scripting community with RSBuddy and PowerBot.

Language proficiencies: Java - 6/10

C# - 5.5/10

Python - 6.5/10

I took AP Computer Science in 9th grade which built my C# and Java foundation (Microsoft came and helped mentor us for this WUMPUS competition was a create your own game - our team one 1st place in design, I was in charge of the Highscores and GUI; can show source code for this.) I've settled my focus on music because of it's liberation but I still love computer science as a field and am learning Machine Learning with my dad trying to help him solve problems for Bing Maps, etc. I like being well-read.

Hobbies: As i've stressed, I like coding, mcing, bodybuilding, and smoking weed. Not trying to appear like a jack of all trades but i'd rather be transparent about my personality. I used to be overweight and so by the time high school hit me I had watched enough Big Brandon Carter and Elliot Hulse to convince myself to track macros and even purchased an 8 week macro coaching course from Physique of Greatness; point being I'm in the best shape of my life after following these habits for the past 2 years.

Why should you accept me?: I make a lot of my money off of flipping supreme. Supreme is a clothing brand based in New York but it is worldwide and has an extremely unique and active market. I won't delve too much into the specifics of my business model but it's profitable and i think warrants enough of my intellect to where I could help with projects in the group itself. I'm only interested if this group is a medium by which we can collect and exchange ideas with the hopes of

making money ?.

Devsoft™ - October 11, 2015, 11:41 am

updated my application ?.

Red S?x - October 11, 2015, 1:54 pm

Looking forward to seeing what this network exploitation group can do.

TwoFeesh - October 11, 2015, 5:14 pm

I am a 20 year old college student. I am going for my networking certificate. I plan to go back to college later to get my degree(under a company). It's fascinating to me how fast things are changing. Programming and hacking are my hobbies on the side. I know very minimal C# and vb.net. I plan to improve my knowledge on them as time goes on. I also dabble in RATs, and encrypting. ATM, I'm trying to develop my own crypter that makes a FUD stub. It probably won't be done for a while, but I will not give up trying to make it. I would love to join and have others teach me stuff about coding. I might even want to pick up a new language such as C++.

Incendiary. - October 11, 2015, 9:00 pm

It is a real shame i do not meet those requirements. Legends is a awesome group I would really love to be a part of.

Good luck to all applicants. PUT SOME EFFORT IN to your applications, honestly. There's hardly one proper application so far.

SIM-2015410 - October 11, 2015, 10:34 pm

Don't hesitate to apply if you have the skills needed. Legends is a great group.

Puppeteer - October 12, 2015, 1:59 am

I'd apply but I'm still in the learning phase, too bad D:

Good luck everyone.

Raymond Reddington - October 13, 2015, 3:09 am

Nothing that interesting yet TBH. Looking forward. ?

Vector.A+ - October 13, 2015, 5:18 am

Why I want to join and who am I.

I am max_steel , I love coding and I do it as a hobby, I want to join in order to interact with other skilled coders and help the community a little bit.For me knowledge is valuable , thats the reason I want to learn and communicate as a real programmer , not copy paste sources and sell them.There

are many reasons I want to join but the mains are

I want to share my knowledge and do practise.

I want to co-work with some of the most skilled members of HF.

I want to teach some of the things I know.

I want to help and thank the community.

Why me and my skills - work - contribution

I mainly help others by posting and making some simple threads , It will be a nice chance to help more if I get accepted. Most of my work is in the trash bin , When I am not satisfied or bored I just do the project and then delete it. I have some coding skills :Mainly C#/VB(not as useless as you think , it is awesome when it comes to rapid development) Then a little bit of Procedural Python and some basic understanding of C++/C. When it comes to marketing ,I have some nice Ideas on promoting products, finding something new to sell etc. but as I said money is not my main purpose.

Contact via PM

That's a little bit about me. I hope I get accepted :)

SIM-2223238 - October 13, 2015, 5:19 am

i hack google twice a day i deserve to be in here

oburoni - October 14, 2015, 4:33 pm

you couldnt pay me to join this cancer if armanda is in it. armanda name one good program you've made LMFAOOOOOOOOO

Balding - October 14, 2015, 4:33 pm

TRH4CK - October 18, 2015, 1:27 pm

Name: TRH4CK

Country: Canada

Skills: Coding (PHP, .NET)

Portfolio: Can be shown via PM.

About me:

My name is trh4ck. I am a programmer. I can code in .NET and PHP. I am currently 17, and will be 18 very soon! I like to code in my freetimes, but to be honest, it doesn't happen as much as before,.. College, kinda uses all my time xD Still I am online a few hours daily. I run a successfull crypter coded in C# and PHP (it's web based <3). I am currently studying in Networking and Securiy, kinda love it. Will probably do a second study next year, in programming.

Also, when coding a website, I really like using Bootstrap based template, either already themed or editing by myself.

That's all I have to say,

if there is anything you want to know just PM/Skype me.

As some groups required from me, to prove myself, I can code something for you guys, if needed!

Thanks, hopefully it'll work out ! ?

A_P_T - October 18, 2015, 7:39 pm

Hello,

About me: My specialty is information security. I work a full-time job doing information security for a large enterprise in North America. I lead the vulnerability management program in the SOC. Day to day operations include using Tripwire, Splunk, and manually checking for CVEs in sites and servers. I assist in writing and editing Powershell and Linux shell scripts for auditing purposes.

Certifications: CEH, Security+, A+

I'm savvy with Nmap and all major vulnerability scanning tools; I'm competent with Backtrack/Kali Linux; I have knowledge of programming concepts - I'm most familiar with web programming; and, have an understanding of networking.

Currently reading "Malware Analyst's Cookbook." I dabble with reviewing source code for malware in my free time and wish to become more competent in programming applications.

I'm kind of paranoid and don't feel comfortable telling you much of my personal life in an online forum.

Thanks for reading my post.

This is a "directed" recruitment.
If you fit the role, we are more than willing to review and consider.?

Vintel - October 20, 2015, 11:21 am

You can call me Vintel as that is what I call myself online.
I have been a .NET developer for about four years now.
I started with VB (Visual Basic) and now I recently started working with C# too.

Since I were about six years old I have been a BIG fan of computers and anything that has with computers to do.

When I was about eight years old I started learning basic programming such as HTML, some CSS and some Javascript. I spent all my freetime browsing my computer and finding new interesting stuffs.

When I was about 12 years old I was running my own Habbo Hotel. A so called Habbo "Retro". I made some money and I were really proud of myself.

Then there came a time when I had a lot of school-related work to do so I didnt program for some months but that didnt stop me. As soon as I got more time I picked up the old things that I used to do.

I have always been a quick learner regarding anything that has to do with computers.

I am pretty new on this forum so I can not show you so much previously works (mainly my other projects are IRL).

However, I've coded 143 VPN's new custom client (Visual Basic). Thats about it this far but I'm sure there will be more coming from my fingers!?

Armada - October 20, 2015, 7:15 pm

Vintel gets my support, he is fairly knowledgeable. This is the only person whom I'll publicly support.

Marwix - October 21, 2015, 9:34 am

Age: 18

Location: Sweden

Which programming/coding languages can you do?

- [•] VB.NET
- [•] C#
- [•] Java
- [•] JavaScript
- [•] HTML
- [•] CSS
- [•] Ruby
- [•] jQuery
- [•] Python

Past work?

- [Thread 1 \(Old\)](#)
- [Thread 2 \(Freelancing\)](#)
- [Thread 3 \(Freelancing/Old\)](#)
- [Software 1](#)
- [Software 2](#) && [Project Image](#)
- [Camtrix Player \(e-whoring\)](#)
- [LummoX Logger Software](#)

Any certifications?

I currently don't have any "Programming" certifications.

However, I have been a Math mentor where I've been taught "Pedagogy group dynamics" and "didactics & leadership".

I have a certificate which shows that I have been going through this education. This could be an advantage in case you guys want me to learn people how to code in Legends.

You can request the certificate through PM if you're interested.

Why should we choose you over the person above you?

The reason why you guys should choose me is because I'm active, I know how to help people, and I can code.

I think my highly analytical mind-set and ability to work quickly makes me a great fit for your group. This is something that I've shown during Freelancing, helping people on the forum and some other work experiences irl.

You could pretty much say that I'm a diligent and highly confident user with a history of success in mind.

Sharkky - October 28, 2015, 4:47 pm

I'm Sharkky, coming from France.

I do love everything that is web related.

Even as a kid, I loved going through the sourcecode of HTML5 and understanding how they worked.

Now, I have a little more ability with these kind of things.

I have coded several websites. I sadly can't show you my portfolio, as these weren't online and my HDD (a SSD) just reformatted itself 2 weeks ago.

Anyway, I'm not a graphic artist, and these were ugly as fuck. I did it for the backend part, to understand exactly how this works. And be able to code one, if a job of webcoder came up.

Among these, I coded MVCs, and I have to admit that it was pretty hard the first time, and took me a lot of time.

I also own a linux server. Used to play with it, opening ports, testing all kind of exploits, creating backdoors, improving my networking knowledge. Put some website on it, to play like a sysadmin. But see, I'm not the type. I do not have any idea to bring something new to the world. that's why I need you guys.

Now, let's skip to the interesting part !

I always loved and will always love exploiting things.

I know how to exploit common flaws on a website such as SQLi, XSS to perform a session hijacking, LFI, RFI.

I read the whole OWASP, meaning I know almost every single less-known flaw.

Now, OWASP doesn't explain everything. Unlike me, it doesn't know how to upload a shell, obtain a reverse connection on a remote host, put a backdoor, rooting, or symlinking to compromise (if any) the host company.

And theres' still plenty of things to learn, I'm sure that I could teach you some things as well as you teaching me things.

If you have any question, just hit me up on skype or with a PM.

If you want some proof, me to code/compromise/secure a website, or whatever, just ask.

Looking forward to hearing from you soon !

Damm, I wasnt accpeted. GL for other applications.

czipeng - November 1, 2015, 11:33 pm

how to apply

from the above i do not found any links

DamienVC - November 2, 2015, 7:11 am

Still recruiting, feel free to apply.

So you never answered my question yet. Am I blacklisted or no? If not I'll write up a reply now.
Please answer in PM as I probably won't see this thread again until I get an answer.

Infinity. - November 2, 2015, 5:19 pm

Goodluck everyone with this, my brother sure knows how to run his group.

sinmar - November 2, 2015, 5:24 pm

with the retards who've been added so far you should probably change your name from legends to peasants

astr0 - November 2, 2015, 6:01 pm

Name: Hunter

Country: USA, EDT

Skills:

Programming (C, Python, 8086).

Network Exploitation

About me:

I'm 17 years old, and haven't been around the scene all that long. Currently, I am mainly focused on preparing for the OSCP test that I will be taking here in the near future. Also in my free time I work a lot towards Reverse Engineering, Software Exploitation, practicing x86 ASM, and hope to exploit some kernels soon!

Skype: as.tro64

-zERaIT - November 4, 2015, 12:51 am

why would someone bother applying to this group? do you get benefits while being in the group? are you guys actually up to something or just another group with a hacking section that is filled with lounge whores?

(Nov 2, 2015 06:24 PM)sinmar Wrote: [\[CITE\]](#) with the retards who've been added so far you should probably change your name from legends to peasants
lol

Local Area Network - November 4, 2015, 12:59 am

Let's make this simple; I want to learn more and you can help me.

Studying for a Bachelors in Data Networking at a University in Australia.

Currently have CCENT, CCNA R/S.

Studying for CCSA (Checkpoint), CCNA Security.

I'm 19 with a genuine lust to learn more about Offensive Penetration Testing.

Let me know if you can help me out.

raymond is a little pissed off because his hacking section wasn't capable of answering 5 simple questions, they just kept dodging the questions lol

Funtage - November 7, 2015, 7:31 am

i do not have autism so i will not be applying, thanks for the invite though anyway and good luck

Im gone brah - November 7, 2015, 4:20 pm

Looks like another shithole to me like everything else here, or is that just me?

Motiv - November 7, 2015, 4:26 pm

May I ask, what does his group even do?

.Dangerous. - November 7, 2015, 9:58 pm

About me:

Ive never applied before to any groups as there was never a programming group of interest. it would be nice to communicate with programmers again. especially people with experience.

programming is a hobby, this forum is a hobby. I intend to keep my personal life out of my online life.

Programming Skills;

Visual Basic 6.0 [1999-2005]

Visual Basic .Net [2003-Current] (intermediate)

CSharp (consider myself beginner/intermediate because of syntax)

Web Development [2000-current] (beginner/intermediate)

Programming Interests:

Main interest was always client emulation of games such as starcraft and it's sister games.. dabbled in simpler hacks however my main focus was directed towards chat and moderation bots that emulated game clients to login the game server., now that's fading away as the newer games changed its complete style where it's not appealing. no more channels, warring etc. I'm leaning towards social media automation. not for money, but for personal gain in my own RL business.

IMO, it appears computers are a dying phase as phones, tablets and apps take over. future interests would be pursuing andriod game development as a hobby.. I enjoy games and have great ideas.

a couple of my very large projects, that feature complex filtering, multiple game logins, clan creations, channel moderation, proxy support and multiple profiles.

my vb6 bot lasted 2001-2005

Spoiler ([Click to View](#))

[img]http://www.elitegrounds.net/botscreenshots/zerobotv1.0.61.jpg[/img]

.net bot started in 2004-current still works on battle.net servers last updated 2011.

Spoiler ([Click to View](#))

[img]http://www.elitegrounds.net/botscreenshots/zerobotbeta0.41.jpg[/img]

as for everyone else that reads this, part of programming groups, irc-networks, skype-groups. feel free to pm me.

Russ. - November 8, 2015, 10:33 pm

Here you go. Made it for this: <http://watsoncoder.allyou.net/> That should have a good amount on

it. If you have any questions feel free to PM me.

Armada - *December 13, 2015, 2:31 pm*

/ End Thread /

Legends has closed its openings for the time being.

Best of luck to all members whom apply in the next round. ?
