Thread: [\[Autobuy\] \[C++\] CrypterOne | Web Crypter | Cheap \\$1 per crypt](#)

CrypterOne - October 14, 2015, 4:06 pm

It is made in C++

(CLEARNET)

[Crypter.one](#)

Super cheap! \$1 per crypt!

Features:

[IMG]<http://crypter.one/style/images/tick.gif>[IMG]Anti reversing: Not only will we encrypt your file we will make it harder to reverse.

[IMG]<http://crypter.one/style/images/tick.gif>[IMG]Small and portable stub: The stub is about 80KB and written in C++ with no dependencies, it will run on Windows XP to Windows 10.

[IMG]<http://crypter.one/style/images/tick.gif>[IMG]FUD! Unlike some crypters that are hardly scantime FUD, we are scantime and runtime FUD!

[IMG]<http://crypter.one/style/images/tick.gif>[IMG]Quick update: We will refud the crypter as soon as we see it starts to get detected.

[IMG]<http://crypter.one/style/images/tick.gif>[IMG]Easy payment: With our automated payment system you can buy crypts at any time without intervention from us.

Sales thread here -> <https://hackforums.net/showthread.php?tid=4995942> And hes banned and you joined this month & he got banned this month. I know what the Inside of the web-panel because his bot or botnet panel had the same theme & layout.

What are you talking about? Can you stop making false claims I have no idea who that person

is...just because I denied you..you make false claims..

You can buy them directly from refud.me which uses payco.re
And scan a darkcomet build.
