Thread: [How to make the byte Crypter FUD ?](#)

xxMultiModZXx - October 15, 2015, 8:15 am

Hey guys I bought the byte crypter, and I cant get it fud :/ can someone help me ? My RAT is Luminosity Link. Thanks in advance.

St?Ik?r - October 15, 2015, 8:16 am

Try to use a fresh icon and also try to change the signature to something legit

LSDoom - October 15, 2015, 3:04 pm

What Stalker said.

The crypter itself might not be FUD and it requires a reFUD from the owner. If thats the case you just need to wait for him to update it.

DamienVC - October 15, 2015, 3:50 pm

Use self injection (to preserve LL rootkit)

Dont use EOF

Enable .NET support

Use a HQ icon/assembly to avoid generic detections

Dont randomly tick upon any feature

Dont use startup/persistence on both crypter and RAT, I suggest you use the crypter only for crypting; and all the basic funcs like startup/persistence from LL/the RAT

matissshakeris - October 23, 2015, 10:24 am

Disagreed. LL install adds runtime detections even kfc said it himself. So i would rather untick everything from LL

^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^

What he said :)

Indahood - October 23, 2015, 12:20 pm

Just watch the tutorial video of the crypter... The crypter is not fud but you can get 3/34 if you use an icon, and the assembly cloner don't forget the obscurficator (the most important part)

saavas - October 23, 2015, 2:32 pm

try to NOT use any icon, and any assemblies, and any obfuscation. i get fud everytime ;)

#Skyline - October 23, 2015, 4:57 pm

Byte crypter should be FUD after every crypt you do.

I'd recommend contacting the owner regarding this also.

Alison Wonderland - October 23, 2015, 6:05 pm

Unless it has Heuristics which can be removed with icon/assembly change

In which case its really not worth the effort to remove until a real detection appears

Hey man,

what is the detection rate of byte crypter now? can you test? please answer :)

AnMiCo

Ofcourse it won't be FUD, it is \$60 for lifetime.

It will not be completely detected on the other hand.

I recommend something like CyberSeal if you want a decent budget crypter that is worth every single dollar you pay for or DataProtector if you have the money)

ConnectTheThots - April 20, 2020, 2:22 am

Currently needing help using Byte Crypter, please contact me on discord if you can help.

Rebellion#3379 I am willing to pay a fair fee if the assistance is good

dud this is five year old thread, you wont get any help posting here.

Just contact the seller of the crypter and he will help you out.

noporkplz - April 20, 2020, 11:12 pm

where byte crypter thread??? ?
