Thread: [-\[No VPN/PORTFORWARD\]- DebugRAT >> PHP RAT << 50+ Functions | Surveillance | #1 RAT](#)

Tostig - October 16, 2015, 6:55 am

DebugRAT is no longer for sale.

NoHax - October 16, 2015, 7:03 am

Looks like a nice RAT, who coded it?

Good luck with sales.

District - October 16, 2015, 7:14 am

Will you be offering vouch copies for this specific product?

Raymond Reddington - October 16, 2015, 7:55 am

a PHP RAT? Good to see this. Good luck with sales.

Anima Libera - October 16, 2015, 8:00 am

Is the output FUD or do you need to crypt? And you should add HVNC if you can.

Khamul - October 16, 2015, 8:07 am

(Oct 16, 2015 08:00 AM)Anima Libera Wrote: [\[CITE\]](#) Is the output FUD or do you need to crypt? And you should add HVNC if you can.

Yeah, I'd like to see HVNC on a legit, non-copy/pasted RAT.

Wardow - October 16, 2015, 8:34 am

It's definitely ZeroRemote Source and also a Divine/Debug Product, ZeroRemote was good so this version should be good also.

Also, can you explain the "Anti Ring3 Packets Hook" and "Kernel Process Security"? Also whats the difference between Disable ZoneChecks and Remove ZoneID?

Please answer, thanks.

Tostig - October 16, 2015, 11:39 am

(Oct 16, 2015 07:14 AM)Phil. Wrote: [\[CITE\]](#) Will you be offering vouch copies for this specific product?

No vouch copies, sorry.

KFC Watermelon - October 16, 2015, 11:48 am

(Oct 16, 2015 08:34 AM)Wardow Wrote: [\[CITE\]](#) Also, can you explain the "Anti Ring3 Packets Hook" and "Kernel Process Security"? Also whats the difference between Disable ZoneChecks and Remove ZoneID?

Please answer, thanks.

Why was this post reported? These are legitimate questions. I have the same questions.

occupi - October 16, 2015, 11:52 am

Isn't a php rat just a botnet controller? It's somewhat closer to a real remote management and monitoring service but I thought the idea of a RAT was remote administration from a single master. I applaud the idea, though, especially if the coding is actually well done.

FRANKIE - October 16, 2015, 11:53 am

Big vouch for my man Viktor, good luck with sales buddy.

Nex+ - October 16, 2015, 12:11 pm

This rat is one of a kind and very unique, works wonders

needitbadly - October 16, 2015, 12:25 pm

Is the output FUD or do you need to crypt?

do you sell a unique PRIVATE version? \$?

Aristocles - October 16, 2015, 3:12 pm

(Oct 16, 2015 08:34 AM)Wardow Wrote: [\[CITE\]](#) It's definitely ZeroRemote Source and also a Divine/Debug Product, ZeroRemote was good so this version should be good also.

@op : Would you mind replying to these questions ? ?

Sho?kwave - October 16, 2015, 3:39 pm

This is definitely ZeroRemotes source code.

ZeroRemote may be well coded, or poorly coded it doesn't really matter, because every Remote Administration Tool that pops up in this section every few months from bought a source code dies within the matter of months (I think I've counted around 10 over the past year)

I'm really getting tired of marketers selling these "popup products" for a quick buck, only to shutdown the product within a few months leaving all their users without a product.

I wish you good luck and if the original programmer is around you may not need it, but if he isn't it's a very high chance that this product only has a few months to live.

Kify - October 16, 2015, 4:14 pm

Not responding to questions and reporting them, not a great way to start a sales thread.

And i agree with Shockwave, no way DebugRAT is going to be alive for a month

Tostig - October 16, 2015, 4:15 pm

(Oct 16, 2015 04:14 PM)Squid. Wrote: [\[CITE\]](#) Not responding to questions and reporting them, not a great way to start a sales thread.

I'm not the one reporting any posts, and I've been at school all day. I've only just gotten home from school. I'll begin answering questions now. :) I wouldn't neglect possible customers or anyone for that matter.

Kify - October 16, 2015, 4:21 pm

(Oct 16, 2015 04:15 PM)Viktor Wrote: [\[CITE\]](#) I'm not the one reporting any posts, and I've been at

school all day. I've only just gotten home from school. I'll begin answering questions now. :) I wouldn't neglect possible customers or anyone for that matter.

I see, well goodluck with sales i guess.

Oh, and i'm sure alot of members would like a hvnc feature, silent miner (SHA-256, Scrypt, x11 etc), ddos (sounds skiddy but trust me, people will buy this just for this feature), a botkiller, silent downloader and executer/stub updater and a registry editor.

And also, does it require a seperate dynamic core library, just like KazyBOT does? And what about the dependencies? Does it have any?

(Oct 16, 2015 11:52 AM)occupi Wrote: [\[CITE\]](#) Isn't a php rat just a botnet controller? It's somewhat closer to a real remote management and monitoring service but I thought the idea of a RAT was remote administration from a single master. Not really, as it has tons of more features than a botnet. And i don't think a botnet could be used for legal purposes, while it's the opposite for a PHP RAT.

rvlt - October 16, 2015, 6:31 pm

Good luck with sales. Doesn't seem bad.

TheUnknownPlague - October 16, 2015, 7:54 pm

this looks very promising and cool GLWS

#Skyline - October 16, 2015, 8:51 pm

I would actually use a VPN for remote administration purposes at all times. But besides that, looks good Viktor, another decent project.

Vouch.

Edward10432 - October 16, 2015, 9:28 pm

How do i setup? Not working for me when i run the stub it says that the remote server has stopped working

Tostig - October 16, 2015, 10:09 pm

(Oct 16, 2015 08:34 AM)Wardow Wrote: [\[CITE\]](#) It's definitely ZeroRemote Source and also a Divine/Debug Product, ZeroRemote was good so this version should be good also.

Also, can you explain the "Anti Ring3 Packets Hook" and "Kernel Process Security"? Also whats the difference between Disable ZoneChecks and Remove ZoneID?

Please answer, thanks.

Yes, we acquired the source to ZeroRemote through the owner of ZeroProducts: Cyph Jr.

The Anti Ring3 Packets Hook prevents your process from being injected into, while the Kernel Process Security sets the process as a system/critical process.

To answer your second question, the RemoveZoneID and Disable ZoneChecks do the same thing, that's a typo in the thread design.

(Oct 16, 2015 11:48 AM)KFC Watermelon Wrote: [\[CITE\]](#) Why was this post reported? These are legitimate questions. I have the same questions.

I'm not sure, I didn't report the post. I'm fine with legitimate questions. It's important for people to know what they're buying, and I'm glad to provide them with answers. :)

(Oct 16, 2015 03:39 PM)Shockwave™ Wrote: [\[CITE\]](#) This is definitely ZeroRemotes source code.

I wish you good luck and if the original programmer is around you may not need it, but if he isn't it's a very high chance that this product only has a few months to live.

Shockwave, I know you're a dedicated developer and you've stuck with your product for a very long time. I assure you that we will not abandon the Debug RAT project. It's a nice piece of software that has great potential, even if the market is saturated. Even though this product is priced competitively, I'm sure you'll suffer no loss of new customers due to your stellar reputation and recent return to HackForums. ?

(Oct 16, 2015 04:14 PM)Squid. Wrote: [\[CITE\]](#) Not responding to questions and reporting them, not a great way to start a sales thread.

Adressed this earlier.

(Oct 16, 2015 06:31 PM)rvlt Wrote: [\[CITE\]](#) Good luck with sales. Doesn't seem bad.
Thanks for your confidence and interest in Debug RAT!

s3ctum - October 17, 2015, 7:11 am

this is something really unique. Looking great! I might purchase in the future!

Wardow - October 17, 2015, 12:15 pm

(Oct 16, 2015 10:09 PM)Viktor Wrote: [\[CITE\]](#) Yes, we acquired the source to ZeroRemote through the owner of ZeroProducts: Cyph Jr.

The Anti Ring3 Packets Hook prevents your process from being injected into, while the Kernel Process Security sets the process as a system/critical process.

Can you explain me what's the relation between Anti Ring3 Packets Hook and prevent from being injected into? and for what purpose is it? and as far as i know it's not really possible, no code from the original program is being ran when injecting.

Tostig - October 17, 2015, 12:56 pm

(Oct 17, 2015 12:15 PM)Wardow Wrote: [\[CITE\]](#) Can you explain me what's the relation between Anti Ring3 Packets Hook and prevent from being injected into? and for what purpose is it? and as far as i know it's not really possible, no code from the original program is being ran when injecting.

Let me clarify: The Anti Ring3 Packet Hook will prevent injection in case of a system-wide injection into all processes. The server will remain intact.

Edward10432 - October 17, 2015, 3:50 pm

It working for anyone? purchased yesterday and still aint working

tweety - October 17, 2015, 8:50 pm

Why PHP? What makes this better than other RAT's? Who is coding/updating it now?

Isn't it better to use a normal RAT with a VPN so you have actual real-time features available instead of this?

Armada - October 17, 2015, 9:45 pm

Officially requesting a "Vouch" copy before I have to pimp slap Damien upside the head to make me a licence that way.

Upon good process a good review will be left, of course. ?

Tostig - October 17, 2015, 9:48 pm

(Oct 17, 2015 09:45 PM)??m^aDa Wrote: [\[CITE\]](#) Officially requesting a "Vouch" copy before I have to pimp slap Damien upside the head to make me a licence that way.

Go and speak to Damien, I'm not sure if we're giving out vouch copies at all. Worth a shot to ask, though.

Armada - October 17, 2015, 10:12 pm

(Oct 17, 2015 09:48 PM)Viktor Wrote: [\[CITE\]](#) Go and speak to Damien, I'm not sure if we're giving out vouch copies at all. Worth a shot to ask, though.

I am literally the best vouch around dude, gimme a test copy.

\\Edit

I just want to say the ONLY reason for my request as such is simple.

Normally Id just pay the money, but Nex broke my reliance in product coming from his realm, and sorry to say, but guilty by association.. I dont trust this 100%

If I am in fact incorrect, I will make it very clear, and pay my dues if I intend on continued use of such software.

Pingoola - October 17, 2015, 11:44 pm

But why is the UI so bad?

Don't get me wrong love the idea of a PHP RAT(first alright-looking one I've seen). But the UI is just an eyesore.

angelman31 - October 18, 2015, 8:35 am

This is a new product which is code based old sucseed RAT called ZeroRemote, DamienVC is very kind and he have quick supporting skills which means they are standing behind of their products always. There is no problem to buy that clear staff.

Wardow - October 19, 2015, 4:56 am

(Oct 17, 2015 12:56 PM)Viktor Wrote: [\[CITE\]](#) Let me clarify: The Anti Ring3 Packet Hook will prevent injection in case of a system-wide injection into all processes. The server will remain intact.

Still, explain me the relation between "Anti Ring3 Packet Hook" and prevent from a process from being Direct Code Injected or Dll Injected?

Show me an Example of this feature please.

Tostig - October 19, 2015, 6:05 am

(Oct 19, 2015 04:56 AM)Wardow Wrote: [\[CITE\]](#) Still, explain me the relation between "Anti Ring3 Packet Hook" and prevent from a process from being Direct Code Injected or Dll Injected?

There's a lack of PHP RATs on the market, we wanted to be different. It's also a great middleground between a botnet and a traditional RAT. Damien and Casper are the ones who I believe will be updating it and adding features. Sure, it might be better in some ways but what if you don't want to shell out hundreds of dollars for a botnet?

(Oct 19, 2015 10:06 AM)Tweety. Wrote: [\[CITE\]](#) Why weren't my questions answered?

<https://hackforums.net/showthread.php?tid=5023949&pid=48233893#pid48233893>

Sorry. Answered them in the post above.

Kify - October 19, 2015, 12:44 pm

'#1 RAT' Is quite a bold statement, php rat's are slow, and require startup money (offshore hosting, which is quite expensive).

What makes it better than the other rat's sold here?

FSBN - October 20, 2015, 12:53 pm

Changed my mind about this rat.. first I thought its not that good but after I saw it in action it impressed me.

1Shot - October 20, 2015, 12:55 pm

Looks hella good. Im gonna get this setup asap

Edward10432 - October 20, 2015, 1:52 pm

Any recommended hosting for this currently using free and its not working.

Tostig - October 20, 2015, 1:53 pm

(Oct 20, 2015 01:52 PM)Edward10432 Wrote: [\[CITE\]](#) Any recommended hosting for this currently using free and its not working.

Offshore hosting is recommended. Make sure to take a look at HF's own hosting marketplace.

CloseMe - October 21, 2015, 3:15 am

Is the RAT stub native?Work the RAT with crypters?

Incendiary. - October 21, 2015, 3:27 am

I think a lot of people would be interested in more screenshots showcasing all features of the RAT :) I will be following the development of this closely. GLWS.

Simaniurity - October 22, 2015, 4:30 pm

First I had problem with download link (bot sent to me wrong url, but ok I downloaded it).

Second when I generate server.exe file and try to run it I have got error: server.exe stopped, here you've got details of error:

Name of problem: APPCRASH

Application Name: Server.exe

Application Version: 1.0.0.0

Application Timestamp: 56296ebb

Fault Module Name: ntdll.dll
Fault Module Version: 6.1.7601.17514
Fault Module Timestamp: 4ce7b96e
Exception Code: c000070e
Exception Offset: 00099fc8

Second window: "sending keep alive packet" all time

when I close second window I have got bluescreen

what's up? I paid for it so I want to get working app

Edit.

I tried to run on second vm and ok, it's working but not as it should.

I have got 1 connected client (my vm), but I can not see this computer on the main list? LOL

I have got:

first one: status: Disabled, Connections: 0

Second one: status: enabled, connections: 1

but do not have this client on the list. so how I can check files, webcam and other if I do not have it on the list? :) I can not paste img (I have got less than 50posts) but if you can I can send to you in private message image.

Albertozinzogat - October 22, 2015, 7:37 pm

He doesn't even have a trial copy of his rat. ??

Simaniurity - October 23, 2015, 3:59 am

There is no answer to private messages. No response on skype.

xKaraibe - October 23, 2015, 4:29 am

Have a hidden website visit function ?

Simaniurity - October 23, 2015, 6:08 pm

When I will get help? Still quiet, no reply on Skype just seller is connected but said that I have to talk with Damien, but he does not responding.

Nex+ - October 24, 2015, 8:37 am

I have responded to everyone who had contacted me

Simaniurity - October 24, 2015, 7:33 pm

Maybe you have contacted, but not your friend. I have opened on PayPal Resolution Centre, I want refund my money.

Tostig - October 24, 2015, 8:52 pm

(Oct 24, 2015 07:33 PM)versmann Wrote: [\[CITE\]](#) Maybe you have contacted, but not your friend. I have opened on PayPal Resolution Centre, I want refund my money.

I just host the thread. What was your question?

Simaniurity - October 25, 2015, 1:40 pm

I have got connected one client in application console, but I can not see this computer on the list. I told with rat mentor and he said that it is bug or something like it, because my vm is connected and I

can't do nothing.

sains1994 - October 25, 2015, 7:31 pm

I saw no vpn no portforward... is this legit? also are there any tutorials online because i am certainly interested. I have some extra PP money to blow lol

Incendiary. - October 26, 2015, 1:23 am

(Oct 25, 2015 07:31 PM)sains1994 Wrote: [\[CITE\]](#) I saw no vpn no portforward... is this legit? also are there any tutorials online because i am certainly interested. I have some extra PP money to blow lol It is legit.

However, instead of a VPN/Portforwarding, you will need bullet proof hosting. This is generally more expensive.

3pun0x - October 26, 2015, 8:41 am

So i pass on over all the comments, and no one has been say that this PHP rat working to him. Be cerful with this, maybe this is a scam...

Malthael - October 26, 2015, 9:59 pm

I'm interested in this. When will you add other functions such as ddos plugin and the like? Waiting for other users to vouch too :)

Nex+ - October 29, 2015, 5:44 pm

We updated the rat 4 days ago and it is working flawlessly

?Syria - October 29, 2015, 8:50 pm

(Oct 26, 2015 01:23 AM)Incendiary. Wrote: [\[CITE\]](#) It is legit.

Not to much iv seen some advertising \$9 at proton host

?Cyber - October 30, 2015, 12:27 pm

(Oct 29, 2015 08:50 PM)?Syria Wrote: [\[CITE\]](#) Not to much iv seen some advertising \$9 at proton host

No decent bulletproof hosting will go for under \$15/month - and that's just for shared hosting

Tostig - October 31, 2015, 11:17 am

DebugRAT has been fixed. We received some bug reports regarding incorrect .Net Framework versions and slaves not appearing in the RAT client, and fixed them. You must install the latest .Net Framework and update to the latest version by re-starting your DebugRAT.

steinisterki - November 3, 2015, 12:30 pm

Hey man looks great, I just bought it and I was wondering if there was any tutorial of some sort or any help I could get. This is my first PHP rat experience.

v.csoka67 - November 3, 2015, 1:16 pm

If this willll have revesersock function, i will buy it.

v.csoka67 - November 4, 2015, 3:15 am

i will buy this with prefect money since other finished :(can you contact me on private message or jabber

v.csoka67 - November 6, 2015, 10:35 am

i bought this rat some time early

it is good because it doesn't require port forwarding but stability is a bit low
function does work but there is a delay

overall a good RAT I would say -worth cheap price

mokkacyan - November 7, 2015, 1:00 am

Will buy this when I'll see a vouch from trusted user, all current vouchers are from users registered in Nov 2015

steev - November 7, 2015, 2:26 pm

add capture mic even to be cool and powerful
my regard for your great work

Nex+ - November 8, 2015, 7:55 am

Big vouch for this RAT, one of a kind and it works flawless, helped me jack over 50 Facebook accounts so far and made over \$750 from hacking gaming accounts!

mokkacyan - November 8, 2015, 10:00 am
